## History

### Pre-RP

Born the last of three children in the family on Tatiana, he grew up as a typical boy on the farm, doing the usual things. Much was spent playing with his older sister and brother, and much of his free time was devoted to practical jokes. He caused most of the 'wars' with his jokes, and it was when one of his jokes accidentally caused the barn to catch fire they decided to limit their activities to a contest. See who could remove most of the stuff that was worth nothing and in the way. By the time he reached puberty he had won the contest as well as lost most of the hair on his arms and eyebrows repeatedly, as well as losing the pinky and ring fingers on his left hand. He focused his studies in school on engineering, chemistry, and physics as it was apparent his brother would receive the farm. This was in hopes of bettering his knowledge of the basic compounds for building bombs, as well as the understanding of how the shrapnel might fly. Half way through school he got his new body, which he has been very careful with thus far, only losing the hair on his hands once.

## Skills

### Demolitions

Because there were always things on the farm to get rid of, stumps, old machinery (after getting the useful bits), and rocks. Also because making ones own fireworks is fun and can earn a bit of profit, and finally, because explosions are just plain cool.

### Fighting

Recieved basic hand to hand combat training, along with the natural brawling that comes with having siblings. He was more focused in close range combat with weapons and firearms, including short range and long range. He has some expierance in Zero-G and Yamatai conditions. He has limited skill with thrown explosions.

### Communications

He is familiar with basic radio operation and procedures and can make transmissions to and receive transmissions from other characters through headsets, starships, power armor, and shuttles in both combat and non-combat conditions. He is fluent in English. He can speak and write both correctly and efficiently and can write reports, fill forms, issue orders under fire, etc.

### Technology Operation

Being the twin to the person with any skill at computers in his family, he has picked up a few things from her. Mainly it was small things, such as basic operations of Kessaku OS, the OS of the Star Army. He became particularly adept at searching for information.

## Mathematics

He took it upon himself to learn basic and advanced mathematics, including physics, geometry, trigonometry, and some calculus.

## Physical

Seven years of gym classes and some wieght lifting to help build his frame. He also took a little gymnastics to build flexibility and dexterity.

## Rogue

Because of his abilities in practical jokes, he became adept at picking locks, misdirection, as well as sleight of hand. He is somewhat streetwise, but his interest in mathematics cut into that.
