Hair Color: Brown

Hairstyle: Long-medium length, straight

Cup Size: D

She has slight fangs and wears a tattered white dress almost all the time. The robot drone she uses is mostly red in color with purple details and purple eyes.

## Personality

Antoinette has been driven insane from her flawed telepathy, as she can't turn it off and it constantly picks up various signals a normal telepathic system wouldn't. Generally she's anti-social, and sometimes she's outright sadistic, especially when it comes to her enemies. Her past has made her cynical, she doesn't trust others (Except for a very rare few) and for the most part doesn't care what happens to them either. She's mostly motivated by her own self-interests. She's lionhearted and extremely hard to intimidate.

## History

Antoinette was born in YE 18 on [Cavalon](#) but was abandoned by her parents. When she was young, she met [Angela Hartbrook](#), who was her only friend. She was kidnapped by Psychopomp as a child in YE 25 and experimented on. Psychopomp implanted a telepathy system in her, however, the system was experimental and flawed. It constantly picks up signals a normal telepathy system isn't supposed to, such as encrypted telepathic messages (which sound like static), radio signals, and solar radiation. It still functions as a telepathic system, as it can send and receive telepathic transmissions, but it also picks up signals it isn't supposed to. This flawed telepathy drove Antoinette insane, and she managed to escape Psychopomp in YE 33. Antoinette was able to meet up with Angela again, even though Psychopomp had

changed her.

She built a remotely controlled robot using android parts and took on the identity of "Strontium" as the robot. Strontium, or as she designated the chassis itself, "[R4D0N "Strontium"](#)", was upgraded over time and eventually came to double both as a remotely piloted drone and a power armor capable of shapeshifting parts of itself. She located a crashed [U-1](#) left over from a previous battle on Cavalon that was still operable and took it. In YE 39, she traveled to Keren in the U-1 with R4D0N and used it to destroy [Chlorate's](#) creators, Uranium and Plutonium. She came back to Cavalon and later heard rumors that Chlorate was on Osman. She attempted to travel to Osman, but the U-1's radio was damaged, and she was unable to respond to a hail. Her U-1 was shot down and crashed on Osman with the android inside, and she was injured from the crash. She was comatose, but hospitalized by OSO. She was transferred to Section 6's medical care, and currently resides in Sanctuary Hospital. In YE 41 she woke up from her coma during an attack by the Reapers. She has amnesia, she's unable to remember who her parents were or why she killed Chlorate's creators and attempted to kill her.

Eventually after waking up, she gradually began to discover her implants have the ability to tap into and remotely control technology. She is not fully aware of this ability yet.

## Skills Learned

Rogue- Having lived on her own for most of her life, she's learned a few assorted skills such as pick-pocketing, lock-picking, and intimidation.

Fighting- She's trained herself in fighting, and is skilled in hand-to-hand combat, meelee combat, and knows how to use ranged weapons.

Engineering- She's learned basic engineering knowledge, and is able to make or modify some machines.

Telepathy- Though her telepathy system is flawed, she's still capable of using telepathy with a range of up to 25 miles.

Remote Control- Her neural implants also have the ability to connect to and control technology, similar to a Geist. She is not yet aware of this ability, but is slowly starting to realize it.
