Snow white, short but spiked in the front. Short beard and goatee combo. Long scar on right side of face running over eye, but eye is not injured. It is very hard to anger him. He is very patient person. Will not stand for the reckless endangerment of innocent civilians and non-combatants. Tends to be cautious and observant unless an innocent is in danger. His hobbies include the modification of weapons, vehicles, and equipment; reading, looking for promising recruits, and playing heavy metal really loudly.

Does not spend his money much unless for his business, or for the customization of equipment. Saved most of his back pay from his time in the military. Hardworking and hopes to claim a planet to create a planet for and run by mercenaries. Tends to be quiet but is open to socializing with others. Will treat others fairly until given reason not to.

Motivated by money, his ultimate goal, to find his lost older sister, and what he feels is right. Loves combat, and always respects his opponents.

# History

Jack Pine was born in [YE18](#).

From what Jack has been told, Jack's mother was an engineer, his father a soldier. Both were stationed on the same vessel during the Third Elysian War. He was born the same day his parents died near the end of the war. Newborn Jack was taken to an escape pod while his father died trying to free his mother who was pinned under one of the ships supports for the corridor when the core overloaded. The emissions from the unstable core lead to the mutation that turned his hair white and his eyes crimson. The overload was caused by damage dealt to the ship during fleet combat against Elysian warships. Jack moved from orphanage to orphanage in Yamatai star systems, then Nepleslian systems, then to the united outer colonies where he met another orphan named [Zeke](#), his future best friend and business partner. They eventually moved to the Nepleslian systems and joined the military when they came of age. Jack showed particular skill in hand to hand as well as weapon/vehicle handling and maintenance, while Zeke showed a knack for communications equipment repair/use. After five years of service they left to form their own private military.

However Jack was actually created by a group of scientist that would later form [PsychoPomp LLC](#). as an attempt at creating the perfect soldier. Obedient, physically fit, loyal, merciless, and devoted to the mission to the point of self sacrifice to achieve completion. The project was dubbed "Fenrir". This experiment was both a success and a failure, as Jack fit every criteria until he formed a conscious. Jack still has no idea of the truth and due to these circumstances has caused mental instability on a deep level. And even more is the fact that [Sarah](#) who they both believe to be his sister was actually the genetic template used to create him.

In [YE39](#), Jack moved out west and became a [Skyguard](#) pilot. He participated in a couple sorties before getting funding from Uso. With these funds he founded [Section 6](#) which was a division of the [Skyguard](#) to further technology, and provide a special operations unit. It was at this time Jack would marry his wife [Isabelle](#) Kazuko, later having her last name switched to Pine. After sufficient personnel and equipment was acquired, they completed their first mission on [Vice](#), in the [Reservoir star system](#). It was during this operation he found his future son [Amit](#).

In early [YE40](#), [S6](#) was separated from the [Skyguard](#) and all skyguard property was removed. This was later replaced as Section 6 became a separate government division of their own. During this time he would adopt [Adria Pine](#) and [Adi Pine](#). [Neera](#) after her body swap was also adopted around this time.

After a home invasion which killed a pregnant Sarah and several others. Jack's clone [Lazarus](#) would kidnap his son Amit. Who was later rescued in a large scale unified assault of Psychopomp assets.

In mid YE40, Isabelle would give birth to two twins. Section 6 would also be the central force of the Xuno campaign. They had significantly expanded their forces, fleet, technology, and facilities.

In late YE40, Section 6 would break away from the [OSO](#) to become their own organization. A terror attack by Psychopomp agents where they kidnapped Jack's granddaughter [Nora](#), the daughter of his clone Lazarus. 18 were killed and more injured, and among the dead was Rorik Istavan, a founding member of S.A.B.E.R. Their journey has since taken them to the void of space. Their destination was set as the star system of [Sanctum](#).

## OOC Information

## OOC Notes

I'm hoping to build a faction with this character, and I hope others will join for the ride. The biggest thing for him is the end goal, but I want the sister character mentioned to be a big factor of his story later. In the case [Jack Pine](#) becomes inactive:

- Can this character be used as an NPC by a GM or FM? YES
- Can this character be [adopted](#) after I am gone for a year? NO
