Physical Description

6'2 with a dark tanned skin, this woman is fair in complexion and youthful in beauty. Orias has butt length, straight almost raven black in shade brown hair. Unsettling, her eyes are gold irises surrounded by black sclera. Her face is soft and in a heart shape, and a rather lush lips.

She looks human enough until you get to certain features of her curvy hourglass shaped body. A pair of small black curved horns, 4 inches in length, protrude from her temples. Paired with the black bat like wings that are part of her body much like those of an Elysian, make it clear she is anything but human. As if these were not enough, a spine like segmented tail extends down from just above the rear. It can pull in, bringing it's segments together to compact. This removes it from being in the way, given its two foot length, which can prove a hindrance in tight spaces.

When extended out and hanging about, it's much like any other tail except that instead of fur over skin. This appendage is like bone segments spaced out with a retractable muscle running through their center connecting them all. To retract, the muscle simply does exactly that, pulling together to only a third of its length where it curls around underneath to the front in an almost protective manner over the private areas.

E cups finish her rather beautiful yet unsettling appearance.

Personality

Uppity, privileged, pompous, foul tempered, devious, cunning, and seductive all describe this anomaly of

a being. Orias as no moral compass that points anywhere towards good. Selfish wind the day with her motivations, along with more carnal tendencies. She cares for few, or willing to even attach herself to others easily. This woman is generally only out to please herself, but there have been signs of change being possible.

History

When exactly she was born, if that term even applies, but she had devoted her being to the dark powers found in the Ayenee universe. That was until the YSS-Kaiyo II came to her world and she made the mistake of possessing one of its crew. This developed a long struggle between her and her host, which ultimately ended in defeat upon their return to the Kikyo Sector. Stopped of her powers and trapped within the mind of Mark Oaklen in a fusion of minds that slowly began to kill him.

Orias is immeasurably old, and essentially immortal. At least she was until ripped from the mind of Mark Oaklen in late YE40. She was remove via a complex process by Section 6, saving the life of her now ex-host, and giving her a life and body of her own. But with one major draw back. The once demon was now powerless and mortal just like those she had once tried to manipulate.

Currently, Orias now resides at Section 6, contemplating on her fate and future.
