Physical Description

- Height: 3'6"
- Mass: 62 Lbs.
- Measurements: 26G-20-32 (Scaled down for size)

Standing at 3'6" and weighing 62 pounds, Valentina has a diminutive, yet womanly and voluptuous figure. She has a hefty and protruding rear, plump breasts, and thick thighs. In a manner similar to that of a Nekovalkyrja, her soft figure belies her physical power and capacity.

Valentina has [light purple](#) hair, [blue](#) eyes, and [dark brown](#) skin. She normally styles her hair in a [short bob cut^{1\)}](#), with [one side^{2\)}](#) almost completely [covering her left eye^{3\)}](#). Her eyes are proportionally large and they are accentuated with [curved eyebrows^{4\)}](#) that have a [darker shade of purple](#) than her hair.

Valentina has a 'kite' shaped facial profile. She has prominent cheekbones, which are slightly wider than her mid and lower forehead. Her facial structure narrows at the chin and jawline. She has a small and button-like nose, plump lips, and full cheeks.

Personality

Valentina is a bio-weapon. Therefore, her personality constitutes all that make her such. Although she is not as inhumane in manner as some other Psychopomp [creations](#), she retains a disturbing bloodlust and machine-like efficiency, that manifests itself whenever she is in a tense or potentially violent situation. In spite of this trait, Valentina is not volatile or undisciplined by any means. Although she has enough initiative to take action independently, she is submissive and compliant when faced with authoritative figures.

She retains an industrious manner and conduct. This manifests itself in her rigorous combat and physical training regime and her high attention to detail.

History

Nicknamed “Mini Monster” and “Little Killer” by the lab that commissioned her creation, Valentina is a lab grown super soldier created by Psychopomp under their [SSI](#) program. Given a uniquely diminutive form by her creators, Valentina underwent a flash training program immediately after her creation. During this period, she was implanted with the [OGU](#) and the [SHAM](#).

Valentina was taught a diverse array of combat and survival skills during her training.

After Operation Ice Breaker, Valentina was captured as a prisoner of war by Section 6. During her period in internment, she was extremely well behaved, and as a result she was treated with decency and respect by her captors. She was released from prison on restricted terms a few months after the battle on the ice planet, with the agreement to serve within the [SSAF](#) for a period of five years before as restitution for her early release and the damages that she inflicted upon S6 assets during her time as an enemy combatant.
