Physical Description

Alyse is a Helasio that stands just over 6'2" in height with an athletic and well-muscled form due to her increased testosterone levels combined with constant physical labour, she has a rather hourglass-shaped and well-endowed figure that is split up by a strong midsection and masculine arms.

Alyse's body shows no signs of abuse or any indication she was ever actually a slave from her owners, they took good care of her but she prefers to wear rigid or somewhat baggy clothing whenever possible, she was created with no tail and has slightly wavy, silver-coloured hair that is usually held up in a bun with a few stray locks coming loose to frame her strong jawline and intensely amber eyes. Her porcelain face usually holds a kind expression that is only amplified by the small set of round, silver ears that poke out of her hair.

Personality

Alyse is what most would consider a gentle giant, something that might not be too common in the Nepleslian hordes but she manages to more than earn her spot - fiercely loyal to her people and more than willing to die for them, while she may not talk trash and can appreciate a few good-natured jokes she will not stand by for abuse nor senseless violence. Alyse has a resolve of steel and would rather die standing by her own morales than live to be someone she will despise, despite this she is quite good at being subservient and taking orders as long as they fall in with her own morals - Alyse has a knack for being great with kids and will protect them with all she has.

History

Alyse was birthed from a vat in a lab some time near the start of [YE 28](#), built from a sample of [Helashio](#) DNA that a semi-wealthy geneticist couple purchased in a private auction - these geneticists played

around with the sample in various ways until they incubated what he saw as the perfect nanny/butler/bodyguard package for their soon to be expanding family.

Alyse was the couple's first unofficial child, she bore their surname as they artificially pumped information into the custom Helashio's mind and aged it to match her body until she was deemed ready to begin training by the expecting couple. Alyse finished her rigorous physical and mental training three weeks before the couple's first child arrived, it was a lovely little family that the Helashio helped to nurture – more than content with her place amongst her creators and never once got treated poorly.

Things were quaint – until [Second Mishhuvurthyar War](#) and then later [Battle of Yamatai](#) hit hard, by the time the smoke cleared and the fighting stopped there was no more family – just a single Helatio born and more than happy to serve but without those she had spent her short life serving.

Alys found herself drifting aimlessly between ports and cargo bays for some while, simply existing day to day with no real purpose until a ship she was on in the north-western part of Yamataian space simply exploded for reasons unknown to her. Next thing she knew, the large Helasio woke up in a Nepleslian hospital bed some while later with a healing crack in her skull and a dry mouth – she had been scooped up as the sole survivor from a small chunk of ship that still had a functioning, albeit barely functioning, bubble of life support.

This sparked something in her semi-subservient mind, a need to pay back on a moral debt she managed to acquire – Alys never found out who specifically saved her but after jumping through a few loopholes, the Helashio found her way into the Nepleslian Navy – starting out as a ship-mechanic for a while even though she did show a good bit of skill in a simulator.

Skills Learnt

NSMC Skills Domestic: Alyse is great with kids, she loves looking after them and generally they think she is a pretty awesome person – she was built with childcare as one of the pillars of her design after all. **Starship Operation:** Alyse is an ace in the cockpit of smaller ships, it's something that she kept in-check during her short time as a freelancer and the Helashio showed a lot of promise in flight simulators but was more than happy to stay a ship-mechanic. **Fighting:** On top of her military training, Alyse was imprinted with knowledge of how to use her larger stature and strength to her advantage in a fight, with a hand-to-hand fighting style consisting of string punches combined with grapples and throws. **Repair and Maintenance:** Alyse has enough skill and knowledge about mechanical and digital systems to repair them if they show signs of degradation, knowing her way around a tool box as well as any technician.
