History

Family (or Creators)

Ketsurui Zaibatsu (Born 23.3. YE32)

Pre-RP

Created in one of the mass cloning facilities of Ketsurui Zaibatsu, Saki awakened one day. She was a regular Neko. Just one of the many. She was from one of the latest batch. From the cloning facility she was transported into Nekoalkyrja training facility where she spent 98 days of her life. She learned to fight, use her SPINE and politeness. In the training she showed eagerness to serve in Star Army and that is why she was recommended to acquire more training at Fort Ready.

Fort Ready

Upon completion of her basic neko-training Saki was moved to Fort Ready. She was too late to arrive in basic training sessions, but she still received training with chemically propelled sniper rifle. She also learned how to act in face of prisoners and how actually catch them. She learned about equipment of Star Army, mainly about its two basic PAs. Daisy and Mindy. After that came that graduation exam which contained of PA space battle and infantry battle on board of ship. In PA Saki managed to survive and accidentally took upon herself leading of other two cadets. In infantry session they all died due to the mistake. In the end Saki still graduated, gained Training award and even got to meet former empress Yui.

YSS Aeon

Upon completing of her training, Saki was assigned to exploration ship YSS Aeon as member of ship's infantry. After talking with Ship's captain Ise Katae, she was allowed to board the ship and join the crew. At first she got some time for herself while Aeon was being repaired. During that time she got to reconcile with Yoshiro-san who accidentally caused their demise in last training mission on FR. She also met and got to learn more about humanity from another trooper Saito Takamori.

Soon after their first mission came and Aeon was sent to Mayer station deep in UOC space to scout the

place and try to evacuate any surviving personell. Right before the mission, Saki managed to get on the bad side of team leader Oshiro Arkase-juni, but soon after they were inserted on Moon's surface via Shuttle. At first they escorted APC towards the station and engaged few crab units along the way.

Soon after they reached the station and inserted via transport hub. There they found some civvies and few NMX neko who immediately surrendered. One of the Nekos warned the team of upcoming wave of NMX parasites. Team hid the civvies and prisoner in custom office of the terminal. Saki was one of few member of the team who stayed outside to battle. Wave of parasites was dealt with but soon followed by two Rippers. Team managed to defeat those too, but Arkase was badly hurt in the skirmish.

NMX tanks appeared outside right after the battle so Kim-heisho had to get out of the APC and met with the rest of team along the reinforcements consisting of trooper going by the name of Makoto. By that time a surviving team of Peacekeepers contacted Yamatai Soldier and linked with them. During the teams meeting together heavy firefight ensued in the terminal. Few rippers and even Render appeared, but combined forces of the Peacekeepers and Yamataian infantry took them down. Saki got the get into melee combat with the Render at the time.

Teams then moved toward the Mayer station hangars to one of the ships still being held there. Sealing the way behind them with explosion they were preparing to blast the hangar door so they could make their daring escape.

Without any pause Aeon headed for new mission. Just after getting some reinforcements, the ship headed to unexplored system with reported NMX activity. Saki armed up heavily with two gauss cannon on her Mindy suit and head down with rest of the Aeon team. They were divided into two teams. Science team lead by Kim and Infantry team lead by Kyoka.

Soon after arriving on the frozen surface of the world, the team was attacked by strange ice-burrowing creatures. These were killed of quickly and team moved in infiltrating NMX hideout. They divided and Saki under command of Yamomoto Trowa, a nepleslian pilot accompanying the team due to the lacks of NCO's. Kim went with them too to get better scanner readings. After little time they found a room filled with prisoners, mining for the NMX. Saki, Trowa and Kim quickly killed all the guards and rescued the prisoners.

Trowa retrieved intel from one of the prisoners and they went up the disabled elevators shaft to rescue the rest of prisoners. Saki and Trowa met tough resistance, which consisted only of unarmoured nekoes, that were quickly dispatched. Reachin the prison block, NMX tried to burn all the prisoners and but the Aeon crew managed to open the doors in time and rescue them from painful and horrible death.

After this mission the Aeon crew received some downtime. Saki made sure to spent this time doing what she liked. She spent some time with Yoshiro, visited a bar and generally enjoyed herself. This finally lead into start of a romantic relationship with Tsubei Kyoka, Saki's room-mate. The two neko spend a passionate night together and became better friends then ever, maybe even more.

It did not took long and Aeon stood before next missions. During assault on important NMX planet Aeon was to proceed with quick attack against enemy prison. Two teams were to invade and hold the prison, evacuate it and then blow it up to smitherness.

Aeon aslo finally got an XO. Kurusu Misaki-chusa. She was a veteran of YSS Eucharis and a samurai. Saki was in the team lead by Kyoka. The team attacked the planet with help of the autonomus walking tanks

TASHA. Saki was in control of one of these deadly machines and made sure to utilize it well.

As soon as they reached the prison, both teams infiltrated it. At first they had to destroy the countermeasures, which was making sure that thousands of parasites won't be released. That would mean death of all the parasites. Even while under attack of enemy PA, Aeon crew managed to defend itself and kill the parasites.

Afterwards Saki team went to explore the lower level of the Prison, where they found a hideous experiment. NMX were using people and mutates them with their own DNA, creating hybrids. The Aeon teams saved them and rescued them along with the rest of the prisoners. The prison itself was then destroyed in fiery explosion.

This was the last mission of war and Aeon crew was preparing to go back to being exploration ship. All the crew needed new specialisation. Saki spend a good time in discussion with Ise Katae-taise. It was decided that she will become new armourer. Also since the current team-leader left the ship Saki was chosen to be new leader of the away team.
