History

Family

Father: O'Kutsuu Kaji (deceased) Mother: O'Kutsuu Hanako (deceased)

Pre-RP

Kame was born on [Yamatai \(Planet\)](#) to a pair of civilian ship construction technicians. At age of 11, she was living with parents to the [Ketsurui Fleet Yards Facilities](#) orbiting [Yamatai \(Planet\)](#). Thanks to her parents, she was instilled a love of building and ships, particularly ships of the military line. Thus it was no surprise that Kame started training for the Star Army at the age of 18 and has been training for the last 3 years as a Star Army engineer. For the most part she excelled during her training except not being aggressive enough when attacking. Well that and the notable 50 page section in her file on damages file military infrastructure due to power armor accidents. Recently, she lost her parents, who moved to [Veritas](#) shipyards nearly a year prior to their death, when the Elysia shipyards and colonies of [Veritas](#) were destroyed in the Battle of Elysia by the NMX.

Skills

Mathematics

Kame has had very extensive mathematics training in Algebra, Trigonometry, Calculus, Statistics, and up to Differential Equations. As an engineer for the Star Army of Yamati, she is passionately well versed in quantum physics and optics.

Engineering

Growing up with ship construction technicians, Kame free time was spent "helping" her parents with the installation of ship components, how to identify faulty parts about to break, the fabrication of ship hulls. During Star Army of Yamati engineering training, Kame would build on this knowledge until she became experienced in the analysis, repair, and manipulation of reactors, FTL drives, and shields systems

Maintenance and Repair

Thanks to her parents Kame is proficient of the basic identification of many ship, fighter, and power armor component problems and how to install those components. As an engineer, she received extensive training in the maintenance and repair ships, power armors, and fighters; however, only in the repair of reactor, FTL drive, and shield systems. In other areas, she is more than ready and willing for the chance to understand and learn.

Construction

Although only a novice, Kame can assist in the basic construction of ship and fighter hulls.

Communication

Kame is familiar with basic radio operation and procedures and can make transmissions to and receive transmissions from other characters through headsets, starships, power armor, and shuttles in both combat and non-combat conditions. Kame is fluent in Yamataian. She can speak and write both correctly and efficiently and can write reports, fill forms, etc. It should be notice that because she is shy she does have trouble getting her voice loud enough to issuing orders unless under fire.

Fighting

Kame received hand-to-hand combat training, followed up with a rigorous training program. She is skilled and experienced in combat both in Yamatai-like conditions and in zero-gravity, with and without weapons. Weapons she is trained in include energy pistols, knives, and power armor. However, it should be noted that she so clumsy when flying in a power armor and has trouble landing.
