

BW-P2 "Wraith"

The Wraith is a pistol with a integrated suppressor system created in [YE40](#). Designed by [Jack Pine](#) and S6-WD, it is now fielded by [Section 6](#) personnel. However, in [YE 41](#), it was handed to [Black Wing Enterprises](#) for manufacturing, and is now fielded by the [New Dusk Conclave](#).

About the Wraith

[Section 6](#) decided they needed a quieter sidearm. Particularly for stealth ops, and lighter security work. so [Jack Pine](#) met with the weapons department, and together designed the Wraith.

Nomenclature Information

- Designer: Section 6, [Black Wing Enterprises](#)
- Manufacturer: Section 6, [Black Wing Enterprises](#)
- Name: S6-P2 "Wraith"
- Nomenclature: S6-P2-1a
- International Nomenclature: S6-W9-1a
- Type: Ballistic
- Role: Pistol
- Length: 6in
- Mass: 3lb unloaded, 3.5lb loaded.

Appearance

The design is very angular and with the front of the gun being thicker vertically, but still level across the top. This is due to the clear fact that this section is composed of attached baffles. The pistol has a textured grip, and rails on top of the slide, and on the bottom of the baffles for attachments.

Discharge Information

- Muzzle Flash: Muzzle flash is imperceptible as the integrated suppressor effectively acts as a flash hider.
- Retort: The pistol only gives of a burst of gases and a ever faint pop which is rather quiet. Due to this, hearing protection is not required.
- Effective Range 1,700 yards.
- Rate of Fire: 8rpm.
- Recoil: Aim will shift up some as the suppressor system acts as counter weight.

Ammunition

- Ammunition [S6-10mm](#)

Round Type	Purpose
Standard	Tier 1 anti-personnel
Hollow Point	Tier 1 anti-personnel

- Round Capacity: 12

Weapon Mechanisms

- Firing Mechanism: Slide action, with the recoil of each round firing moving the slide back, before stripping a new round from the box magazine.
- Reloading: Box magazine fed.
- Mode Selector: There is a safety on either side of the slide towards the rear which locks the

hammer. No mode selected as there is only one mode of fire.

- Firing Modes: Semiautomatic, as the gun fires on each pull of the trigger.
- Safety Mechanism: The Wraith comes with a new DNA safety coded to only registered personnel. If not registered, the lock remains engaged and will not fire for the unauthorized user.
- Weapon Sight: The weapon uses tritium night sights, or attachable optics.
- Attachment Hard Points: The Wraith has an attach point on top of the slide for pistol mountable optic sights, or volumetrics. The baffles for the integrated suppressor system have a rail section on the bottom of each. Here a flashlight, or laser sight can be mounted.
