

EM-J4-E3500 AI

Emrys Industries

A Tamahagane Company

The EM-J4-E3500 AI was created for the [EM-J4 MARI Series Drone](#), it became available in [YE 35](#).

Details

Manufacturer: [Emrys Industries](#) Nomenclature: EM-J4-E3500 Type: AI Computer Class: Electronic
Designer: [Tamahagane Corporation R&D](#)

Note: [Emrys Industries](#) has programmed the J4-E3500 with a safe guard to prevent it from awakening and becoming sapient. The J4-E3500 while it can learn skills, is not programmed to grow in mental capability. If a customer requests that the safe guard be removed, the corporation requires that the client sign a document releasing the corporation from responsibility; and requires the customer document their plan to allow the [EM-J4](#) to be self-sufficient if it achieves it.

Initial Programming

All EM-J2's equipped with the J2-V3400 have the following capabilities upon activation.

- [EM-J2 Behavioral Paradigms](#)
- [Basic motor skills](#)
- [Language Yamataigo \(邪馬台語\)](#) or [Trade \(language\)](#), customer option
- [Basic item interactive knowledge](#)
- [Basic Repair Procedures](#)

Program Definitions

This section provides details about the programming.

Basic motor skills

All EM-J4 have complete knowledge of how to move and control their body. They are capable of walking, running. They can sit and stand without difficulty. They are capable of picking up and interacting with objects.

Language

All J4-E3500 have a working knowledge of the language(s) preloaded. They are capable of carrying on a conversation in the language. Their initial speech form is very formal. However, the base programming does not include idioms, slang, contractions, and dialects. When confronted with one the AI will ask the speaker for clarification. With experience the J4-E3500 will learn and integrate their usage.

Basic item interactive knowledge

The J4-E3500 is programmed with a basic knowledge of how to interact with its environment. It pick up objects without breaking the accidentally. They can easily use manual and electronic doors. They can use keypads and other mechanisms.

Basic Repair Procedures

The J4-E3500 is programmed with basic technician skills, it is capable of performing diagnostics, inspections, and common repairs. It can expand upon these skills by downloading procedures and technical specs for the craft they are working on.
