

Ionic Adhesive

Ionic Adhesive is [Emrys Industries](#)'s super adhesive intended for use in their repair kits, and became available in [YE 34](#).

About

The Emrys Ionic Adhesive is a two part product that binds objects at a molecular level. The two parts are called Alpha and Beta and are colored white and brown accordingly. The two parts are only slightly adhesive on their own. When they come in contact with each other, they react forming the Ionic Adhesive. Ionic Adhesive is available in liquid or strip form.

Details

Manufacturer: [Emrys Industries](#) Type: Molecular Class: Adhesive Designer: [Tamahagane Corporation R&D](#)
Prices:

- [5 KS](#)

Using

To bond two items typically one should be treated with Alpha and the other with Beta. Press the two items together firmly for sixty seconds.

Liquid

The liquid is dispensed in a bottle with a roller ball to ensure even application.

Tape

Tape comes in a roll of fifty yards, with a plastic backing. Cut the tape, apply to surface peel protective backing. Backing allows the user to apply the tape with little contact with the chemical.

Ionic Solvent

Ionic Adhesive can be removed by the application of Ionic Solvent. The solvent is a catalyst which dissolves the bonded adhesive. It can take up to sixty seconds for the bond to be broken.
