

EM-J2 Series Servitor Android

Emrys Industries

A Tamahagane Company

The EM-J2 Series Servant Androids were created to perform specific tasks, they became available in [YE 34](#).

About the EM-J2 Series

History

The EM-J2 Series androids were an offshoot of [Emrys Industries](#) research into advanced cybernetics. They chose to make the android human form, so that it would be better able to interact with people, and work in areas where humans were present without difficulty.

Appearance

The EM-J2 is a human form with customizable appearance. The standard height is 5' 7" (average height of the citizenry). They have standard hands with four fingers a thumb and feet with five toes. For more specific details about the appearance see the various models.
