

Geshrinari Corridors

The corridors on the [Ge-Y2-1a - Hanto-Class Starship](#) were designed by [Geshrinari Shipyards](#) for comfort and aesthetics.

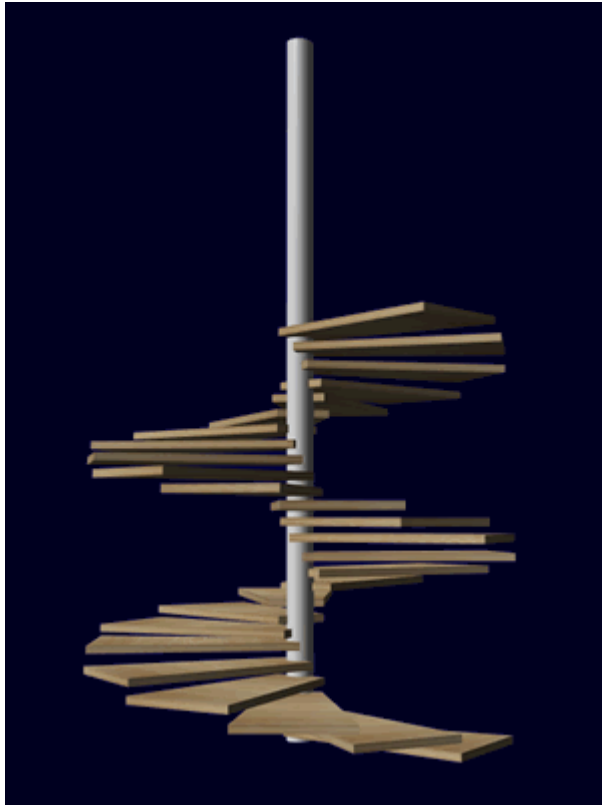

The floors are covered in tile with a wood appearance. They chose to not use actual wood in the hallways to reduce the risk of fire. The corridors are two meters wide, and two meters high. Wooden railings are positioned along the walls for use during periods of zero-gravity.

There is ceiling mounted lighting positioned at regular intervals, as well as [Ge-Y1-E3104 - Automatic Fire Suppression System](#) dispersal nozzles.

Stair Case

[Geshrinari Shipyards](#) on civilian ships provides spiral staircases to allow passengers and crew to travel between decks.

The staircase has steps that are two meters wide which allows people to go up and down at the same time. Clearance is 2 meters as well. The stairs surface depends on the customer's preference.
