Geshrinari Standard Crew Quarters

Geshrinari Shipyards provides quarters that are a balance of function and comfort. The room is intended for two persons. This new design was first used on the *Ge-Y2-1a - Hanto-Class Starship*

A standard ship's door with a Ge-Y1-E3103 - Intercom System opens into the end of the room. Immediately to the right is a desk and chair, there is an integrated touch keyboard in the desk, and a display on the well. To the left there is a small couch.

Next there is a set of bunk beds. Along the back wall are two large lockers where the occupants can store their personal items. A small set of display shelves is located between the too lockers. Crew members are responsible for cleaning and maintaining their living space. They may also accessorize their quarters so long as they do not damage the cabin.

There is ceiling mounted lighting, as well as Ge-Y1-E3104 - Automatic Fire Suppression System dispersal nozzles through out the suite. The floor is covered in the standard floor covering for the ship.
