

# Ge-H2-V3300 - Station Life Support System

The Ge-H2-V3300 is the latest large scale installation life-support system, first installed in the [Ge-H2-1a - Amatsu-Class Spaceport](#) in YE 31.

The system has all the functions of the [Ge-Y1-V3100 - Life Support System](#) but scaled for large installations. Typically one of these installations is installed for every 10,000 individuals in the facility. Each system is kept independent so they can be isolated in the event of biological incident.
