

Geshrinari Modular Aether Plasma Drive

Geshrinari Shipyards developed the Modular Aether Plasma Drive based on the [Ketsurui Fleet Yards Turbo Aether Plasma Drive](#). It was developed for the [Urufu-Class Light Cruiser](#). They designed the drive to be completely modular, including the entire drive. At a properly equipped facility a complete swap of a MAPD can be accomplished in three hours.

Functionality wise this drive operates the same as the [KFY Turbo Aether Plasma Drive](#). As such this engine is restricted technology and only available for [Star Army of Yamatai](#) vessels.
