Geshrinari Hyperspace Fold Drive

The Geshrinari Shipyards manufactured hyperspace fold drive is their fastest FTL system available. It surrounds the ship in a distinctive pale blue bubble. The initial design dates back to the beginning of the company.

The Geshrinari Shipyards design overall has not changed drastically. Improvements in charge time and efficiency being the biggest. Newer drives YE 32 or newer are equipped with an emergency capacitor shunt. Which reduces the risk of damage to the engine when encountering an anti-FTL field.

Performance depends upon size of ship, and charging times are variable. This table represents current production values.

Drive Base Performance

Ship Size	Speed	Initial Charge Time	Additional Charge	Maximum Travel Distance
Shuttle	105,192c (0.2 ly/m)	30 minutes / 10 LY	5min +5 LY	20 Light Years
Small starship	262,980c (0.5 ly/m)	5 minutes / 20 LY	5 min +5 LY	40 Light Years
Medium starship	394,470c (0.75 ly/m)	30 minutes / 30 LY	10 min +15 LY	60 Light Years
Large starship	210,384c (0.4 ly/m)	15 minutes / 20 LY	5 min +5 LY	40 Light Years
Huge starship	195,192c (0.2 ly/m)	30 minutes / 30 LY	10 min +10 LY	60 Light Years
