

Ge-F6-1A - Light Freighter

The old Ge-F6-1A [Geshrinari Shipyards](#) Light Freighter is a staple of small-scale transport across the galaxy. It is easily modified and widely distributed. They run 10,000 to 25,000 KS depending on age, condition, and modifications.

Origins

The F6 is the sixth modern incarnation of Geshrinari Shipyards' light freighter. The original version, created more than a century ago, went through multiple refits and redesigns before the blueprints came into Geshrinari's hands. First produced in YE -05, Geshrinari's version revolved around four concepts:

- Ruggedness
- Easy modification
- Efficiency
- Low cost

The result was a starship with a distinctly agricultural feel, but it lived up to the concepts. The F6 is practically a luxury freighter in comparison.
