

Kirinov Automotive Servicer and Supplier

Created in early [YE 40/EE004](#) by its founder (and now CEO) Kirinov Se'Kosa, Kirinov Automotive Servicer and Supplier (KASS) intends to become the central designer and manufacturer of automotive technologies for the [Kingdom of Neshaten's Division of Public Safety](#).

About Kirinov Automotive Servicer and Supplier

Kirinov Automotive Servicer and Supplier was established primarily to assist [Shukara Armaments and Manufacturing](#) as a dedicated [vehicle](#) and vehicular equipment designer and manufacturer so that the major [corporation](#) could focus its manpower and time on other aspects. KASS; however, is not an official subsidiary of SAM and acts independently of it, usually being commissioned by the [Division of Public Safety](#) to build and maintain its fleets of vehicles and improve them as more technology is developed.

Motto

"Driving the way forwards."

General Information

The following is general information about the Kirinov Automotive Servicer and Supplier [company](#).

Kirinov Automotive Servicer and Supplier	
CEO	Kirinov Se'Kosa
Faction	Kingdom of Neshaten
Product Symbol	Ka

Headquarters

Kirinov Automotive Servicer and Supplier's headquarters and primary production facilities are located on the [eastern continent](#) of [Nesha Prime](#) in the city of We'Mena.

The headquarters itself is a large abstract-style building - in the shape of a rounded rectangle which curves up into a top point - with a colour scheme that changes as it travels upwards. Along each 'side' of the building are three colours, each of which takes up about a third of the total space on the aforementioned side's surface while slanting upwards; if someone were to fly around the building clockwise, the colours would spiral upwards to the point of the building. The spiral starts off as a rich red, transitions into a golden yellow above, and finally becomes an ice white near the structure's top; lastly, each side of the building has a different colour at its base - but they all follow the same rotation to ensure that each side leads into the next.

The headquarters is run by the CEO Kirinov Se'Kosa and his executive team, houses all of the company's administrative staff, and is outfitted with multiple meeting rooms to hold meetings both for internal staff and when other groups request an audience; additionally, private security forces and information technology specialists, designers, and manufacturers are located within the building - they are primarily located in offsite facilities.

Facilities

Although the Kirinov Automotive Servicer and Supplier company is a relatively new group, they had considerable help from the [Shukara Volunteer Navy](#) and the [Division of Public Safety](#) - thus they already have several majority facilities located on [Nesha Prime](#).

Central Continent

The following section contains information about the major Kirinov Automotive Servicer and Supplier facilities located on the [central continent](#) of [Nesha Prime](#).

- **Netoshen:** The primary KASS manufacturing plant is located within the capital and permits [Division 5](#), the [DoPS](#), and the [military](#) to easily request [vehicles](#) at a moment's notice. Surplus production is usually sent to the Kester facility for storage and later distribution.
- **Kester:** The biggest Kirinov distribution centre on the planet is naturally located in the biggest import/export city on the planet and allows for the safe transport of products to other cities that have little to no KASS presence; additionally, it serves as the storage depo for raw materials and imported components waiting to be sent to the company's other facilities.

Northern Continent

The following section contains information about the major Kirinov Automotive Servicer and Supplier facilities located on the [northern continent](#) of [Nesha Prime](#).

- **Chin'Tre:** The smallest facility in the company can be found in the hidden city of Chin'Tre and specialises in prototyping and testing top secret technologies for future usage on [DoPS](#) and [military vehicles](#). As one can probably imagine, the production capacity of this facility is limited due to its small size - thus it's almost entirely used for prototypes.

Eastern Continent

The following section contains information about the major Kirinov Automotive Servicer and Supplier facilities located on the [eastern continent](#) of [Nesha Prime](#).

- **We'Mena:** The primary KASS facility is located in one of We'Mena's industrial districts. It functions as the central research facility and maintains production rates for the continent, hence it's often

visited by the CEO and executives to oversee production and receive updates on the performance of other facilities.

Structure

The company is split into 4 major divisions: Administration, Design, Manufacturing, and Sales & Marketing. Each of these main sections - in addition to being in charge of its own staff and assets - has its own set of floors within the company headquarters building that can be occupied by its specific staff members for quick access to the central executive command of the business.

Executives:

- Hina Ke'Kotov (Female [Laibe](#))
- Rona La'Petrov (Female [Daur](#))
- Tonis Yila'Novus (Male [Laibe](#))

Administration

Administration is by far the most widespread department of the company - as any good administrative department should be - and has members inside every single one of KASS's departments, facilities, and outlets on [Nesha Prime](#). Administrative staff employees are responsible for keeping the reports of the other departments in line with the business goals and keeping all of the company's paperwork and records up-to-date and accurate.

- **Head of Department:** Brenton Gi'Aldi (Male [Daur](#))

Design

As its name suggests, the design department works primarily on researching and developing new types of [vehicles](#) and components. Most of this work is done digitally, however, there are groups stationed within some of the manufacturing facilities to perform physical testing and small-scale work.

- **Head of Department:** Tisa Ren'Lov (Female [Daur](#))

Manufacturing

The manufacturing department oversees the upkeep and general operation of all company facilities regardless of their location. This department is mostly made up of fabrication specialists and various science personnel who help to ensure there are no chemical issues with the composition or construction of [vehicles](#) and components.

- **Head of Department:** Kane Molt'Na (Male [Laibe](#))

Sales & Marketing

The more public side of the company, Sales and Marketing is combined into a single department which deals with the promotion and tracking of Kirinov Automotive Servicer and Supplier and its products. Members of this department are trained in social analytics and often have experience in customer service.

- **Head of Department:** Fenko Di'Fal (Male [Laibe](#))

Products

Since its creation in [YE 40/EE004](#) Kirinov Automotive Servicer and Supplier has designed and produced the following products for usage by civilians, the [Division of Public Safety](#), or the [Shukara Volunteer Navy](#); although some DoPS and military vehicles have a listed price, they are only for the appropriate organisations to purchase and use - as the price is only present due to the company being used as a third-party contractor.

Civilian

The following is a list of the Kirinov Automotive Servicer and Supplier products that are currently available for purchase by the general public.
