

KAIMON/Ascendant Companion

The [KAIMON/Ascendant](#) Companion is a drone used by the [Yugumo Corporation](#). It is a special tool and companion provided to all employees when they join the company. It became available in [YE 43](#).

About the KAIMON/Ascendant Companion

A multifunction assistant drone issued to [Yugumo Corporation](#) employees.

KAIMON/Ascendant Companion	
Year Released	YE 43
Designer	Yugumo Corporation
Nomenclature	Yu-O2-2A
Manufacturer	Yugumo Corporation
Brand	KAIMON/Ascendant
Fielded by	Yugumo Corporation
Range	22 hours primary power
Maintenance Cycle	Monthly
Lifespan	More than 25 years with proper maintenance
Damage Rating (Version 3)	Tier 2
Production Level	Mass Production
Pricing	Internal-Use Only, 8,500 KS
Sorakagami Aerospace Operations Suite	+3400 KS Factory, +4250 KS Retrofit

History

In [YE 43](#), the [Yugumo Corporation](#) released the [KAIMON](#) sentient AI electronics suite. Employees were equipped with the [company uniform](#) which had various integrated electronics (through [Dataweave](#)) and compatibility with the new system. The [Yugumo Corporation](#) wished to extend those electronics, as well as provide employees with AI companionship to assist with tasks, maintain morale, and provide real-time tracking to task completion and project management. The [KAIMON/Ascendant](#) Companion design was produced and it more than filled the expectations of the company, as that provides each and every employee with an individual experience with a [KAIMON](#) AI. It also would provide feedback and experience to systems higher in the hierarchy in a greater capacity. It even provides a low-level defense system for employees in the field.

In late [YE 44](#) this model was extensively upgraded to the 2A model. As this drone was only used internally by [Yugumo Corporation](#) before the upgrade was released, all existing units had been upgraded before the beginning of [YE 45](#).

Appearance

The [KAIMON/Ascendant](#) Companion is a sphere-shaped drone that is 25cm in diameter. It has a small compartment for docking tools, with a small robotic arm that can be extended. The system also includes a small [graviton beam](#) system, that has a circular aperture on one side of the drone, which can assist with moving objects of up to 200kg. Using its volumetric projection system it can adapt its visual appearance to look like a small animal (a bird is a popular choice).

Dimensions

The [KAIMON/Ascendant](#) Companion is a sphere-shaped drone that is 25cm (\approx 10 inches) in diameter.

Function

The Companion provides the user with:

- A programmable Sentient AI system, that becomes an assistant and companion to the employee.
- A variety of programmable appearances and disguises. (It can use [Solid Volumetrics](#) to appear as a variety of animals such as birds, or even fictional cartoon-like characters)
- Programmable personality.
- Full use of the [KAIMON-Passage](#) level sensors and communications. Includes uplink module to [SYNC](#) and civilian levels of [PANTHEON](#). Also includes audio and visual recording options for dictation and meetings. Features an [extended sensor suite](#).
- Expanded use of the projected datapad system included in the [company uniform](#).
- A small [graviton beam system](#), that has a circular aperture on one side of the drone, which can assist with moving objects of up to 200kg.
- [Solid Volumetrics](#) to project interactive terminals and displays.
- Air compressor and vacuum pump:
 - Pneumatic and hydraulic pumps with (very small) reservoirs.
 - Replaceable-cartridge high-flow air filter/purifier, with humidifier/dehumidifier/heater/cooler/fan and ozone generator.
 - Replaceable-cartridge water filter/purifier/carbonator/desalinator.

- Water heater/chiller with pressurized steam system.
- 3m extendable/retractable intake hoses with covers and multi-stage filtration: one each for air, water, and miscellaneous fluids.
- Self-cleaning system.
- 3 Independently-aimable RGB/IR/UV headlamps with high power, wide beam/flood, and narrow beam/spot modes.
- High powered, high-definition, ultra-wide-band stereo speakers.
- Real-time tracking and project management tools for the [Yugumo Corporation](#).
- Panic modes with strobe, siren, and emergency beacon functions.
- Privacy-mode for off-hours companionship.
- Personal computer mode for running applications, playing games, and text, voice, and video communications.
- Secure small¹⁾, lighted, watertight and vacuum-sealed, insulated, and padded internal storage space.
- Charging and data port for when out of range of the wireless recharging system or communications network.

The [KAIMON/Ascendant](#) Companion can communicate in [Trade \(language\)](#) and [Yamataigo \(邪馬台語\)](#) by default, with optional language pack downloads available.

Arms and Attachment Storage

Six small, retractable, articulated functional robotic arms, emerging from the rear but forward facing, with reconfigurable, three-fingered-with-mutually-opposed-thumb grippers that can lend an extra hand to carry documents, or other small objects, are evenly, radially spaced around central sensor and projector. They are capable of reaching behind, above, below, and to the sides of the drone, as well as forwards, thanks to multiple degrees of freedom.

Six wedge-shaped storage bins, each much larger than the small storage area on the lower front, in the rear are arranged in a circular configuration in the spaces between the arms. They are airtight, waterproof, pressurized to an adjustable atmosphere, and protected by the drone's light armor. They have an external lock override for the owner or authorized technicians in the event the drone is non-responsive. These double as the housing for the drone's various [attachment packages](#), and are each able to interface with a specific attachment package²⁾.

The arms and bins may rotate around the central core of the unit around its forward-rear axis, to ensure an equipped arm is in the optimal position to employ its attachments.

Attachments

The Companion's attachments come in wedge-shaped, sealed units that are hot swappable into the appropriate storage port. When the appropriate attachment unit is slotted in behind its corresponding arm, it equips that arm with the ability to deploy those tools in addition to its gripper-manipulator. Attachment positions are numbered zero through five, corresponding to their nomenclature, beginning at the top of the unit and proceeding clockwise relative to looking at the unit's front.

Powered-Multitool-Utility Attachment

Powered-Multitool-Utility Attachment, [Yu-O1-M4400](#) (750 [KS](#)):

- Tools may operate in electric, hydraulic, or pneumatic modes.
- Assorted drill bits, burrs, and brushes.
- Assorted screwdrivers, sockets, hex keys, and other drivers, with precision torque limiter.
- Needlenose and blunt pliers, wire cutter/stripper, and shears.
- Reciprocating and circular saws with assorted blades, files, and grinders.
- Reciprocating impact device with blunt, chisel, and awl points.

Electrical-Data-Electronic Attachment

Electrical-Data-Electronic Attachment, [Yu-O1-M4401](#) (1000 [KS](#)):

- Multispectrum RGB/IR/UV flashlight with high power, wide beam/flood, and narrow beam/spot modes
- Multispectrum RGB/IR/UV laser pointer and burning/cutting laser
- Dataport Access Tool (universal self-configuring)
- Logic probe.
- Multimeter.
- Microchip/RF tag programmer and destroyer.
- Precision  [soldering iron](#) with refillable internal  [solder](#) dispenser.

Engineering-Construction-Industrial Attachment

Engineering-Construction-Industrial Attachment, [Yu-O1-M4402](#) (1500 [KS](#)):

- Small precision plasma torch for cutting, brazing, welding, or firestarting:
 - Refillable  [flux](#) dispenser³⁾.
 - Replaceable gas reservoir⁴⁾.
- Electric arc cutter and welder with refillable  [flux](#) dispenser⁵⁾.
- Refillable [Molecure Tape](#) dispenser⁶⁾.
- [Ministruct](#) with very limited storage space.
- Extendable/retractable articulated endoscopy body (1.5m):
 - 1-1000x 3D optical microscope.
 - RGB/IR/UV halo light.
 - Ultrasound transducer head.
- Extendable magnetic part retriever.

Pneumatics-Vacuum-Hydraulics Attachment

Pneumatics-Vacuum-Hydraulics Attachment, [Yu-O1-M4403](#) (750 KS):

- Air and water pressurization tanks for pumps (very small).
- Fluid/powder/aerosol sprayer/painter combo
 - Assorted nozzles
 - Swappable storage reservoirs, self cleaning system, variable mixing valve⁷⁾.
 - May spray air, water, and other fluids from intakes or pressure tanks.
- Pneumatic dart and ball-bearing launcher:
 - 0.1-3mm continuously-variable-diameter bore.
 - Reloadable internal magazine, capacity varies with dart or ball-bearing size.
 - Range varies with dart size, maximum about 15m.
- Specimen collector with six sealable, removable, and replaceable specimen containment tubes⁸⁾.
- Hydraulic manifold connector.
- Vacuum cleaner and blower with multiple attachments and filtration. Removable debris chamber, autonomously emptiable.

Medical-Emergency-Aid Attachment

Medical-Emergency-Aid Attachment, [Yu-O1-M4404](#) (2500 KS):

- Pulse rate, respiration rate, pulse oxygen, blood pressure, and skin temperature probe.
- Emergency defibrillator.
- Emergency intubation and ventilation.
- Laser scalpel/ablator/cauterizer.
- Multisensor probe net for EEG, EKG, ECG with refillable [Molecure Tape](#) dispenser⁹⁾.
- Dispenser/applicators for [MedicaGel](#) and [Liquid Bandage](#).
- Hypospray injector with six selectable removable/replaceable reservoirs¹⁰⁾.
- Remote [biomonitor](#) telemetry interface.
- Heat/cold/vibration pressure and massage therapy applicator unit with infrared and ultrasonic capability.
- Foam splint spray dispenser (single use refillable reservoir¹¹⁾).

Safety-Security-Survival Attachment

Safety-Security-Survival Attachment, [Yu-O1-M4405](#) (2000 KS):

- Electrical stun weapon
 - [Tier 0 \(Personal\) or 1 \(Light Anti-Personnel\)](#),
 - Direct contact electrodes.
 - Remotely operated darts with reloadable internal magazine (capacity 4, range 15m)¹²⁾.
- Universal [Fire Extinguisher](#)  with single-use replaceable reservoir¹³⁾.
-  [Flare launcher](#) with reloadable internal 2-capacity magazine¹⁴⁾.
-  [Long-Range Acoustic Hailing Device](#).
- Parabolic and laser directional microphones, with sonar and laser rangefinders.
- High-intensity discharge flashlight with general illumination, signaling, emergency strobe, and

blinding weapon modes.

- Refillable magnesium spark wheel.
- Refillable smoke projector, with realtime color and thermal-opacity selection.

Propulsion and Range

The [KAIMON/Ascendant](#) Companion has a built-in anti-gravity system, and micro-thrusters for maneuvering, station-keeping, and attitude control. It can sustain speeds of up to 25-35km/hour (atmospheric in 1G).

The system recharges wirelessly when in the field of influence of higher [KAIMON](#) systems. It holds a charge in its capacitor system of sustaining roughly 22 hours of continual use outside of the recharge range. Additional capacitor modules can also be carried by the user for additional operational life with swap-out.

It can be charged through a charging port compatible with most mobile power generator systems.

Systems

The subsystems and construction of this drone.

Hull Construction

The hull and frame of the drone are made of very thin [Durandium Alloy](#). Its inner systems bay is lined with [Yarvex](#) and [Yarvex Foam](#).

Power Systems

The system uses a rechargeable capacitor system that recharges wirelessly when in the field of influence of higher [KAIMON](#) systems. It holds a charge in its capacitor system of sustaining roughly 22 hours of continual use outside of the recharge range.

Electronics Suite

The drone is equipped with [KAIMON-Passage](#) along with its integrated communications and sensor systems. [ELECTRA](#) may be activated for qualified operators.

The [Sorakagami Aerospace Operations Suite](#) is available as an option, allowing the drone to participate in joint aerospace operations.

Expanded Sensors

In addition to the [KAIMON](#) sensor suite, the drone has even more sensor capability:

- Multi-domain electromagnetic and RF spectrum and signal analyzer, ionizing radiation detector/analyzer.
- 3D omnidirectional-binaural microphones, ultra-wide-band, with audio spectrum analyzer, noise cancellation, and passive and active sonar modes.
- Ultra-high definition 3D camera array, extendable/retractable articulated, with thermographic imaging, low light, infrared, and ultraviolet, 1-20x digital and optical zoom, wide-angle, and macro, light level sensor, visual spectrum analyzer
- Ambient temperature, pressure, relative humidity, air quality/particulate, oxygen, carbon monoxide and dioxide, volatile compound sensors, chemical and biological/pathogen detector/analyzers, gas chromatograph-mass spectrometer

Propulsion Systems

The [KAIMON/Ascendant](#) Companion has a built-in anti-gravity system, and micro-thrusters for maneuvering, station-keeping, and attitude control. It can sustain speeds of up to 25km/hour, and about 10kt underwater.

Electromagnetic Shielding

The drone uses a basic electromagnetic shielding system in conjunction with its [Solid Volumetrics](#) to project a bubble around itself, and its user, for small-scale protection from attack. ¹⁵⁾

Anti-Tamper Systems

The drone will create an internal systems overload if it is tampered with. The [KAIMON-Passage](#) system will also clear its memory.

Explosive Self-Destruct

The drone can be set to explosively overload on tamper or by remote command or programmed criteria, with selective power up to [Tier 4](#) damage in a 2.5m radius, less one damage tier per additional 2.5m range, down to [Tier 0](#) at the outermost radius.

Energy Pulse Weapon

The drone is capable of emitting a short-lived directed energy pulse.

- Discharge color: Bright Blue.
- Pulse-Mode: [Damage Rating \(Version 3\)](#) Tier 1.
- Heavy-Mode: [Damage Rating \(Version 3\)](#) Tier 2. (Only in the presence of continuous recharge from higher [KAIMON](#) system)
- Capacity: 75 shots in pulse-mode. ¹⁶⁾
- Range: 100m (with accuracy) 200m (maximum)
- Rate of Fire: 1 pulse per 2 seconds.

OOC Notes

Adding Your Companion to your Inventory

You can add a cool table to your character inventory. An example of a functional one is [Motoyoshi Taro's KAIMON Ascendant Companion](#).

```
^ <name of your character>'s KAIMON Ascendant Companion ^^
^ [[corp:yugumo_corporation:drones:kaimon_ascendant_companion|]] ^^
^ Image of Most Used Projection | Description of the most Used Projection,
the Companion's personality and relationship with its owner. |
^ Attachments | The listed added attachments. |
^ Access | [[corp:yugumo_corporation:systems:kaimon|]] Network,
[[stararmy:systems:pantheon|]] (Only for those in the [[stararmy:start]].|
```

Taro's KAIMON Ascendant Companion	
KAIMON/Ascendant Companion	
	Most used projection is a green frog that wears a top hat. It is often seen hanging out on Taro's right shoulder. Taro has named his Companion Chimon, which means gate to wisdom in Yamataigo. Chimon's personality is bubbly and fun-loving, often known for making funny quips to brighten even the darkest of situations.
