Peacekeeper Heavy Industries

This Corporation, founded in YE 37 became defunct as of YE 41 when Peacekeeper Heavy Industries was absorbed into the corporate structure of Motoyoshi Hanei Kaisha.

About Peacekeeper Heavy Industries

Peacekeeper Heavy Industries was a former state-run business enterprise dedicated to the rebuilding of Jiyuu and restoration of its technical prowess, PHI is not just a spiritual successor to former United Outer Colonies corporations such as Motoyoshi Fleet Yards, Kakutama Heavy Industries, and others... but it is quite literally built upon the ruins of their numerous former facilities in the Yugumo Cluster, reclaimed and rebranded for a new purpose.

Company Statistics	
Established	YE 37
Motto	*"Working for Peace"*
Director	Mochizuki Shiori
Associated Factions	Yamatai Star Empire
Merged Into	Yugumo Corporation
Acquisitions	Kakutama Heavy Industries
Former Business Partners	Yugumo Corporation, United Manufacturing Cooperative, Kakutama Heavy Industries
HeadQuarters	Jiyuu System
Nomenclature ID	PHI, Pi (PreYE 41) Yu Yugumo Corporation (YE 41 forward)

Former Corporate Divisions

Peacekeeper Heavy Industries had the following Divisions:

PHI Divisions	
Peacekeeper Works	Colonial Administration in the Yugumo Cluster. Control was handed to Sunflower Corporation in YE 37. The Sunflower Corporation was also merged into Yugumo Corporation in YE 41.
Juugoya Cooperative	An agricultural cooperative. It became a subsidiary of Yugumo Corporation in YE 41

Former Main Facilities

Facilities formerly run by PHI:

- Corporate Headquarters on Jiyuu III, Atarashi Tokyo
- Administrative offices on Asura III, Mochizuki Beach

- Former Motoyoshi Fleet Yards Mining Operations platform, Siren System
- Former Motoyoshi Fleet Yard Headquarters production facilities, Jiyuu III, Furui Tokyo
- Former Kakutama Heavy Industries industrial offices, Jiyuu III, Furui Tokyo

Licensed Product Lines

PHI has directly acquired the means of production for the following product lines:

- Motoyoshi Fleet Yards-designed starships, power armor, older Star Army Intelligence equipment, and Stellar Link Siphon (Retconned) power technology
- Kakutama Heavy Industries-designed starships, clothing, and supplies
- Starship-grade Duremium Alloy, as well as Sitearium and Stellarium stealth coatings
- Limited production of NovaCorp - Products
- Acquired licensing rights from the former Lorath United Manufacturing Cooperative to produce and service their extensive catalog of equipment.

R & D Projects / Original Products

Although primarily an industrial production company, PHI does, however, maintain a small R&D consulting team whose focus is more on finding ways to adapt and improve upon already existing, proven technology to increase its usefulness to the Jiyuuian people throughout the cluster. Rather than getting bogged down inventing things whole cloth, this methodology ensures any innovations are quickly able to be tested and fielded by the respective parties. Above all this former Peacekeeper brain trust strives to continue advancing the objectives outlined in the original Dokuritsu Project.

The following systems have completed development:

- Na-V6-W3801 "Dark Zenith" Anti-Neutron Cannon (in conjunction with NAM Aerotech) - Cancelled when acquired by Yugumo Corporation.

The following were redevelopment:

- Modernization/upgrades of the Ionoche class Light Carrier & Ayana-Class Escort
- Development of additional upgrade modules for the MIKO Electronics Suite.

OOC Notes

The company initials of PHI is a reference to Phi (ϕ), the symbol for the golden ratio in mathematics and geometry. Peacekeeper rank patches were gold-colored.
