

Ze-J2 "Steve" Combat Robot

The J2 series combat humanoid robot is an inexpensive combat robot produced by [Zen Armaments](#) beginning in the third quarter of [YE 31](#). It is essentially an updated version of the [Ze-J1 "Jimmy" Combat Robot](#).

Ze-J2 robots are built on steel alloy skeletons with fullerene armor coating. They're about twice as strong and fast than the average [Nepleslian](#) or [Human](#). Their heads have an evil-looking expression and two glowing red-orange eyes. They feature wheels on their feet that allow them to reach speeds of up to 112 kph (70mph).

The "Steve" possesses a somewhat rudimentary intelligence, focused on basic infantry tactics. They can't really carry on a conversation, but they can follow orders; they communicate by audio or via radio. J2 robots currently ship with a [Zen Armaments 10mm Submachine Pistol](#) (Tier 1, Light Anti-Personnel), but can utilize any weapon a human can hold.

Like the Ze-J1, the Ze-J2 is battery powered. It can operate at full capacity for up to 72 hours. A hydrogen fuel cell system (an optional part not all Ze-J1 androids have) can extend their operation to two weeks. They aren't power intensive machines.

The robots are mass-produced on [Rufusland](#) for use by the [Nepleslian Reds](#).

Cost: 500 KS each.

Damage Capacity

See [Damage Rating \(Version 3\)](#) for an explanation of the damage system.

- Armor: 5 SP (personnel scale)
- No shields

| Products & Items Database | |
|---------------------------|--|
| Product Categories | robots |
| Product Name | "Steve" Combat Robot |
