Kynjodau'tajo Aorq'ka (Information Technology)

The *Poku Saeruo Degonjo* developed their information technology by using their own Qaktoro central nervous system as a template. Over the centuries they have systematically improved upon the technology making it more robust and reliable. Their information systems are mostly synthetically created organic systems.

The Otâmovi Wiy Jael (Silver Moon Sect) originally produced all but the Jodau Yoqajo (Integrated Brain) on the Poku Movi Vamâqi (Clan Void Berth). With the advent of the successful colonization of Âmuar (Dream), manufacturing facilities were established there. The integrated brains are gathered, created and maintained in the Sect facility on the Sotâka Ruomâqi (World Station) until required.

Most of these technologies have been used by the Poku'vonai since before the Norka (Exodus).

Computers

- Jodau Sumanâjo (Synthetic Brain)
    - Ryauos'te (Living Spirit)
- Jodau Fiqorka (Module Brain)
- Jodau Yoqajo (Integrated Brain)

Components

- Iginâ Wumyjo Fiqorka (Neuron Storage Module)
- Iginâ Jodau'ta Fiqorka (Neuron Processor Module)

Devices

- Iginâ Yoqa (Neural Link)
- HS-PE3-1a Mako'sa Jodausa (Computer Pad)
- HS-PE4-1a Mako'sa Kyn (Data Pad)

Connectivity

- Taka Norjopa (Machine Speech)
- Norjopa Yoqa'te (Machine Connecting)
- Kinfemy Poku Kyn (Clan Lore Network)

OOC Notes
