- On the left, [Poku-Rya'ta \(Ambassador\)](#) to Yamatai, [Tesgi Toioky](#), a [Tula](#).
- On the right, [Vonai-Rya'ka \(Emissary\)](#) [Kohaku Syali](#), a [Minkan](#).
- Behind and in the center, [Poku Wotanu'ka \(Defender of the Clan\)](#) [Legos Miaurm](#), a [Qaktoro](#).

Presentation

The [Poku Saeruo Degonjo](#) provided the following displays to tell their story at the [International Relations Conference of YE 36](#) in [YE 36](#).

Beginning

The image shows the center of the Capital city on the [Otâgolisoy \(Birth world\)](#). Tall buildings ring a large park with dense foliage. The camera rotates showing the skyline around the park, then passes through the city, once out of the capital it shows the countryside passing below then streaks upwards into space.

Ending

This image of the [Otâgolisoy \(Birth world\)](#) as seen from three light seconds away. A myriad of black vessels can be seen surrounding the world. In addition to the black ships, the image shows an assortment of dying clan ships. The black ships fire their main weapons at the planet. Massive explosions on the surface are seen. Large fractures in the surface soon become visible even from this distance. The barrage continues until the core explodes reducing the planet to expanding gases and debris.

Hope

The image shows a scene of the surviving arks joined together with construction docked for the first time after the [Norka \(The Exodus\)](#). Through a series of still images the first section of the [Sotâka Ruomâqi \(World Station\)](#) appears above the ship. The montage of still images shows the continuing construction that would last 100 years. It ends with the current image of the [Sotâka Ruomâqi \(World Station\)](#) in space.

Survival

This is a still image depicting the discovery of [Lost Ark - Âdor-Pedavuome \(Stormy sky\)](#) and the massive rescue/salvage operation. Dozens of clan ships swarm around the damaged ship to evacuate personnel and as much of its cargo as possible.

New Beginning

This is a still image of the settlement [Tioasme \(Unity\)](#) on [Âmuar \(Dream\)](#). The [Wunyaka Vonai \(Ark\)](#) that the planet was named for dominates the skyline. Sections of the great ship built more than 800 years ago have been removed being used as materials for the new settlement.
