

Wunyli Gianaka (Fuel Storage)

This chamber is where [Poku Saeruo Degonjo](#) vessels store and reload fuel Hydrogen Containment Modules and Anti-Hydrogen Containment Module. The storage tanks hold enough fuel to refill the modules for [Sumanâ-a Tyokanorjopa \(Fusion Reactors\)](#), and [Âmanus Tyokanorjopa \(Anti-Hydrogen Reactor\)](#) several times. There is enough storage space on the racks to hold all the containment modules for when the ship is berthed or being repaired at [Poku Movi Vamâqi \(Clan Void Berth\)](#).

The room is a restricted area, and is entered through a standard [Anomu Wunyte \(Security Door\)](#) for access. The room has [Damira Jyaonpa \(Environmental Controls\)](#), and an intercom station for the occupants. Hull braces composed of [Mâqirây \(Bound Metal\)](#) protrude from the side [Anoi \(Walls\)](#). The floor is covered in a non-static surface. There are [Tyo'te Wuny'ta \(Fire Suppression\)](#) ports and standard [Ibâ'te \(Lighting\)](#) in the ceiling.

There is a [Makoa Kâbo'ka \(Work Console\)](#) and [Buvoli Kâbo'ka \(Work Chair\)](#) that controls the fuel loading/unloading.
