

Ibâ'te (Lighting)

This page details the kinds of lighting used on [Poku Saeruo Degonjo](#) vessels and installations. Given that the majority of the clan live in the [Sotâka Ruomâqi \(World Station\)](#) lighting is essential for health and morale. Lighting falls into the following categories.

Public/Common Areas

This covers hallways, dining areas, recreational rooms, religious facilities and other enclosed places where groups gather.

Diurnal rhythms are observed with lighting systems varying in time with the normal cycle from the [Otâgolisoy \(Birth world\)](#). This includes the cyclical changes with the seasons. Lighting in these areas is a combination of lighting elements to recreate the type sunlight the clan grew up under. This means both visible light and ultra-violet light is produced.

Private/Work

These areas lighting is controlled by the individual preferences, or the activity going on. Typically they feature only visible light.

Ibâ'te Kâbo (Task Lighting)

Featuring only visible light, these lamps are motion controlled. Found in [Lekaokâur \(Crawl way\)](#) or Climb Shafts.
