

HS-SS2-S720/00 Anoka Wotanu'pa (Defense Shield)

The Anoka Wotanu'pa (ă-nōkā wōtă-nū-pă) are the standard defensive shield generators used on [Poku Saeruo Degonjo](#) fighting ships. The basic design for these shields dates back prior to the [Norka \(The Exodus\)](#).

Description

The defense shields generate a protective barrier around whatever they are installed on. Due to the energy requirements the Defense Shields are only mounted on the clan's starships and stations.

General

Class: Defense Nomenclature: HS-SS2-S720/00 Type: Shield Designers: [Otâmovi Wiy Jael \(Silver Moon Sect\)](#) Manufacturer: [Otâmovi Wiy Jael \(Silver Moon Sect\)](#) on [Poku Movi Vamâqi \(Clan Void Berth\)](#)

The shield generators are always mounted in pairs, and larger vessels require more than one set. Each pair of generators require the entire output of a [Âmanus Tyokanorjopa \(Anti-Hydrogen Reactor\)](#).

Due to the amount of heat the generator produces when absorbing damage. Each generator has a nitrogen canister that is use to rapidly cool the generator down for reinitialization. Once the canister has been discharged it must be replaced after battle.

Shield level: Advanced - 0.8 x Base Structural Points
