

# HS-SS1-E739/00 Anoka Udano (Gravity Shield)

The [Poku Saeruo Degonjo](#) use Anoka Udano *Shield of Gravity* to protect their ships during passage through movidoanoi *space tunnels (wormholes)* using their [Tinvyma Movidoanor \(Tunnel Drive\)](#)s. The Gravity Shield is a technology the clan had prior to the [Norka \(The Exodus\)](#).

## General

Class: Defense Nomenclature: HS-SS1-E739/00 Type: Shield Designers: [Otâmovi Wiy Jael \(Silver Moon Sect\)](#) Manufacturer: [Otâmovi Wiy Jael \(Silver Moon Sect\)](#) on [Poku Movi Vamâqi \(Clan Void Berth\)](#)

## Description

The Gravity Shield uses a separate set of [Heim Force Generator](#) and creates a pocket of controlled gravity. The generators are positioned at various points around the ship and emitters are placed on the exterior hull. Inside the shield the gravity is kept at a constant level, while outside of it is anti-gravity. This also makes the shield effective at protecting the ship during high speed STL travel from dust and debris. The outer edge is a negative gravity field so the debris is deflected away from the ship as it passes. Strength of the shield depends on the size of the ship.

A vessel can expand the size of the shielded area to cover ships that do not have them. However, the field strength diminishes by the inverse square rule. eg: Doubling the size results in a strength reduction of 1/4.

## Defense Value

This value is only for use determining protection against the [Udano Rotyka Sakopa \(Gravitic Shock Cannon\)](#)

Ship Class	SDR
Small Escorts	2
Destroyers	2
Cruisers	3
Carriers, Heavy Cruisers	4

Ship Class	SDR
Battleships	4
