

Âmanus Tavigo (Annihilation Torpedo)

The Âmanus Tavigo is the newest weapon system developed for the [HS-SC2-1a Yome Daho'ka \(Battle Hawk\) Class Ship](#) for the [Poku Saeruo Degonjo](#) in 754 CY (YE 35).

About the Âmanus Tavigo

The Âmanus Tavigo fires an anti-matter plasma torpedo. It is an improvement upon the [Âmanus Rotyka \(Annihilation Cannon\)](#) in the fact that it does not lose effectiveness over distance. The weapon consists of the core and two containment fields. The Âmanus Tavigo charges the torpedo and fires it magnetically. To make minor corrections in trajectory the weapon vents minuscule amounts of plasma. If the projectile does not reach its target within six seconds it will detonate.
