

Udano Norjopa (Gravity System)

This page provides information on the types of gravity systems used aboard the [Poku Saeruo Degonjo](#) vessels. The systems are relatively unchanged from those the clan used prior to the [Norka \(The Exodus\)](#).

Internal Gravity

[Qaktoro](#) really dislike zero-gravity, so all manned craft have some sort of [Heim Force Generator](#) powered modules installed. Gravity modules come in a variety of sizes. each has a [Heim Force Generator](#) and one or more field emitters. They can typically produce constant gravity up to 2G of force. Default value its 1.1 G or Standard Clan Gravity.

Inertial Dampeners

On most ships additional gravity modules are installed in the bulkheads and configured to produce powerful rapidly varying g-forces in a specific area. These are used to reduce the effects of inertia on the crew during tactical situations.
