Movi Geanme Tyokanorjopa (Quantum Foam Reactor)

The *Poku Saeruo Degonjo* have been using Quantum Foam Reactor since prior to their arrival in the Kikyo sector in YE -719.

Overview

The clan Quantum Foam Reactor is similar to the Kaminari Quantum Foam Generators.

Usage

The Quantum Foam Reactor is used to supply primary power on *Poku Degonjo Saeruo* starships, space stations. They supply power for the following systems:

- Propulsion
- Life Support
- Defensive Systems
- Avionics and Electronics

Operation

Prior to entering a Movidoanor *(wormhole)* they bring the ship's Sumanâ-a Tyokanorjopa (Fusion Reactors) online and put the Quantum Foam Reactor on standby so that the reactor is not damaged during transit.

The Quantum Foam Reactor produces superheated fluid to be channeled into Gean Norjopa (Generator) to produce electricity.
