

Numvâ Norjopa (Waste System)

This page describes the technology used by the [Poku Saeruo Degonjo](#) for waste management. This system has remained unchanged since prior to the [Norka \(The Exodus\)](#).

All waste material regardless of the source goes through the same process. First it is dried by heating, and the water vapor extracted and sent into the [Kyafofi'a Norjopa \(Water Purification\)](#) system.

On ships once the waste is dried, it is compacted and stored for removal upon return to the [Poku Movi Vamâqi \(Clan Void Berth\)](#). Once in the [Poku Movi Vamâqi \(Clan Void Berth\)](#) it is processed in the [Ânamus norjopa \(Recycler\)](#).

The waste systems on the [Sotâka Ruomâqi \(World Station\)](#) do not have to store the waste as it is taken directly to the [Ânamus norjopa \(Recycler\)](#) maintained there.
