Blue Gift Expanse

Bue Gift Expanse is a retailer that sells Iromakuanhe products in the Iruotl System.

About Blue Gift Expanse

This company sells many products from sources such as Altjira Biomedical, Sogol Group, and Solan Starworks. The company was started by Saathi Pavitra after a few failed attempts at technology related careers. She had come into a surplus of tech to be sold discreetly in AR 942. Through the connections she had made that way, she was able to take out a small business loan and soon had opened one of the fastest growing tech stores, hitting an untapped market of quick purchases while the product remained of exceptional quality.

Not even a year into the business and Saathi Pavitra had been approached by Aashi Nath Werner on behalf of a friend of the Iromakuanhe, Koga Akemi, who wanted some of the locations on space ports in the Kikyo Sector and so began a deal to do so.
