

# Empty Resonance Pulse (ERP)

The Empty Resonance Pulse, or ERP, could be considered to be an [Iromakuanhe](#) analogue to the flashbang, on a scale befitting modern warfare. It employs a combination of controlled space compression and exotic charged particles in a manner similar to the [MRS](#) and [ERS](#), but in short-lived multi-directional pulse. Lasting several seconds, the pulse can be projected in all directions, or in a cone or similar shape at the pilot's discretion. This causes a potent blackout on long and short-range sensors, and is ideal to temporarily blind, via lingering exotic charged particles, guided projectiles or closing pursuers. Units mounting an active [VSS](#) are unaffectedly by lingering particles, but will experience the same effects as being in an [ERS](#) while in the AoE of a directed multi-pulse.

Specifications			
Craft Type	Max Pulse Range	Max Pulse AoE	Duration
Powered Frame	800 M	50 M	5 Seconds
Starship	2.4 KM + Ship Size	240 M	10 Seconds
