Listening Device

The Solan Starworks Listening Device is a system employed to passively intercept and sample data being transmitted through unsecured methods. It is also a critical component in many important electronic warfare devices, and allows Astral Vanguard starships and vehicles to track the communications of hostile forces. As the unit approaches the source of the transmissions, it becomes increasingly easier to track, until a positive match can be made at a certain threshold.

Specifications		
Medium	**Maximum Interception/Detection Range**	**Tracking Range**
Radio	1 200 000 KM	30 000 KM
Microwave	600 000 KM	15 000 KM
Subspace	15 000 KM of Receiver or Sender	5000 KM

Communications that can be intercepted include:

- Radio
- Microwave
- Subspace (requires Vector Wave Sensors)
