About Seigan Solutions

Seigan Solutions is a private military company with a strong ethics codes that is primarily interested in acquiring wealth and information. It operates a mercenary unit, but only takes jobs after extensive scrutiny and confirmation that the proposed operations is an 'ethical job'.

History

Funded by the [Iromakuanhe Astral Commonwealth](#) as a means to explore and gather information on the various other factions in the sector without needing to reveal itself to them, 'Seigan' is the tentative name of a [Vanguard Intelligence Agency](#)-led reconnaissance group that intends to pose as mercenaries to gauge the ideology and power of the various nations in the denser 'core' of known space. Composed of ex-military starship operators, frame runners and general infantry, as well as a number of embedded

[Vanguard Intelligence Agency](#) agents and SOF volunteers, the *Seigan* are meant to be the eyes and ears of the Commonwealth in the 'turbulent frontier' that it perceives the core systems to be.

Seigan agents originally transported their equipment and personnel in stasis through anonymous 3rd cargo carriers and runners, largely [Freespacers](#), and then assembled everything onsite in neutral space. Traveling north and fleeing NMX attackers, they claimed refugee status in [Democratic Imperium of Nepleslia](#), they found their own PMC agency and registered it on legal networks, using allied hackers to retain high anonymity and avoid raising suspicion.

Seigan has yet to undertake a high profile mission to date, and has largely pursued civilian activities using their modified [Ac-L2-01b Ys-class Trawler](#), the *ISC Keren* and carried out escort missions for nervous cargo haulers.
