

Nepleslian Military Equipment

(Note: Alphabetized. Keep it that way!)

The [Star Military of the Democratic Imperium of Nepleslia](#)'s stocks equipment from a variety of sources like [AwesomeCorp](#), [NovaCorp](#) and mainly from its government's own technology production house [Nepleslian Arms and Munitions](#). Nepleslia has a policy of acquiring good equipment from 3rd parties and helping build up corporations on Nepleslia with production contracts.

Defense Platforms

Wormhole Gates

- [Na-S/S-03a 'Zvonock' Wormhole Gate](#)

Starships

Nepleslian starships tend to have a 'real starship' feel, usually ignoring aerodynamics in favor of building ships that are better set towards actions in space. They use shuttles, drop pods, and specialized transport ships to move equipment between space and the surface of planets. The nepleslian military also has a large number of support craft available which make up the infrastructure of Nepleslia. The primary producer of starships for Nepleslia is [Nepleslian Arms and Munitions](#).

- [Vampire Patrol Craft](#) (Discontinued)

Nepleslian Lorathi ships

Nepleslia contained a limited amount of assets gifted by the Lorath upon their mass departure from the Kikyo sector. Most of the assets have been given to the [1st Assault Fleet](#), With the remaining LSDF continuing to field and manufacture for their own use.

- [Warhorse Heavy Cargo Ship](#)
- [Red Hill Medium Cargo Ship](#)

Planetary vehicles

Compared to [Yamatai](#), Nepleslia has far more of its population planetside, specifically on Nepleslia itself. Between slums with bad roads, hyper-developed cities, transit over ground is difficult, forcing the military to use a variety of rugged vehicles.

Helicopters and Misc Craft

Nepleslia is one of the largest users of helicopters and atmospheric craft in the setting. Since the average citizen on Nepleslia doesn't need to go into space, they are much more common than shuttles or space vehicles.
