Mass: 4.7 ilbs ROF: 400 Rounds/min

Appearance

Discharge Information

Projection/ammo type: 12 Gauge Buckshot or Slug.

Firing Mechanism

A short-stroke gas system is defined as one that diverts high pressure gas from the middle or rear portion of the barrel that impinges on the piston head for a short period of time before excess gas is either cut-off, vented, or the piston head reaches a stop. The distance the piston travels under pressure is generally less than its diameter. The piston may or may not be attached to the bolt carrier. This is the most common type of gas operation.

Ammunition Description

Caliber: 12 Gauge Shotshell Effective Range 10 Meters. Maximum Range: 30 Meters. Muzzle Velocity: 1100 (FPS) Muzzle Blast: Large flash followed by traces of burning powder (12 Gauge) Firing Mode: Single Shot/Automatic Damage Description: Multiple pellets shot at a single target. Heavy damage at close range, degrading as range increases. Recoil:

- Moderate for 12 Gauge

Ammo: 20 in magazine.

Weapon Mechanisms

Safety/Fire Mode Selector: Ambidextrous button toward the rear of the trigger. Weapon Sight: Reflex “ghost ring” sight mounted on the fore end of the weapon. Attachment Hard Points: Hard points are located under the forearm grip.

Price

550 DA

Other
