

Nepleslian Wanted And WIP Pages.

This page is a page of articles desired by or currently in progress by the [Democratic Imperium of Nepleslia](#) faction.

Wanted Pages

These are pages desired by the FMs or even other core nepleslian players that they otherwise don't have time to create or finish themselves. This section should not be seen as *"If you want to make something for the faction you must make this"*. But more *inspiration* for things the faction currently needs to give potential creators ideas and inspiration.

If you choose to make a nepleslian article there are a few things to keep in mind:

- All articles should start in the *wip:faction:nepleslia:* namespace.
- Relevant technology when approved should be listed on the [Nepleslian Military Technology Encyclopedia](#)
- Relevant equipment including tanks, armor, weapons, ships, drones, etc. When approved should be listed on the [Nepleslian Military Equipment](#)
- The main creator of all Nepleslian military equipment is [Nepleslian Arms and Munitions](#).
- Other, Secondary corporations for nepleslian articles are usually corporations such as [Zen Armaments](#), [Ken-TEC](#), [Styrling Vervaardiging](#), and [Origin Industries^{1\)}](#)
- Nepleslia has its own [Star Navy of Nepleslia Starship Speeds](#)

Please feel free, FM's, to add things to this list that are relevant!

When working on articles, please keep the following in mind:

Requested Nepleslian WIP Articles

This is a list of articles, ideas, technologies, etc. Currently desired by the Nepleslian FMs who do not have the time to make:

- [Kikyo Mercenary Charter](#) to be finished and submitted.
- Any of the [occupations](#) created, touched up, fleshed out, or finished.
- [NAM 'Suplex' Joint Strike Cruise Missile JScM-01a](#) ~~to be submitted~~. Submitted and approved, thanks demibear!
- Any nepleslian *Battleships* to replace the [Primus Class Battleship](#) which is at threat to be taken off the wiki.
- a [M10 Raider Light Armor](#) MK II or M11 version as the old raider is at threat to be taken off the wiki (can use the old art)
- Any Nepleslian ship. (see free art/models bellow for free-to-use assets to make a ship after)
- Any starship grade weapons.

- Any starship grade modules, interiors, rooms, etc. pages.
- Any starship grade technologies.
- Nepleslian space stations military or otherwise.
- The updating, format, and above all else expansion of lore on any nepleslian planets. Especially in its colonial expanse and Mishu captured worlds in its southern territories.
- Expansion of nepleslian technologies such as the iconic [Mass Mesher Device](#).
- The update and expansion of the nepleslian [gate](#) network. Both the article page and lore wise.
- Added lore, technologies, and focuses on nepleslian minority groups such as the [Kuznyetski](#), [Delsaurians](#), Nepleslian Jiyuu²⁾, [Mutants](#), Nepleslian Neko/Yamatians, Hanyadi, etc.
- Updates to older [Nepleslian Military Equipment](#) such as updating to DRv3, New art where applicable, New variants, New lore. A good example is the [Na-S/Sh-01 Zachitnik-class Shuttle](#), [Corona Heavy Gunship](#), [Na-S/Ca-02 Rok'Veru-Class Carrier](#), [VTOL "Viper" Gunship/Troop Transport](#), etc. Which could all use updates to their pages, lore, and even overhauling to new modern variants such as what was done with the iconic [HHG 'High Hybrid Gun' YE 40](#) version.
- [NAM Terratech Multi-Role Cavalry Armor-"Nomad"](#) is abandoned and up for grabs for anyone who wants a mostly-fleshed PA concept with included art.

List of current Nepleslian WIPs

No pages in this namespace.

Free Nepleslian Art Assets

This is a section of art, models, etc. That has been created and either never used or their pages are taken from the wiki. These are free to use for **Nepleslian** pages for the faction and are not free-use to make for other factions or personal projects outside of the faction. The artists or the creator's name will be listed if it can be found. Most are made by [Charmaylarg](#) unless stated otherwise, please list your name as the creator of art or models if you want credit for them.

The list of images and models may be long, Use the index/directory at the top of the page to navigate. If you use any of the models or art please remove them from the page and list the reason being in the "Edit Summary" that you have claimed them.

Misc Art

Tech

Cyberdeck-style Terminal

90s/cyberpunk style robust utilitarian terminal device.

Tech Goggles

Cyberpunk/scifi style tech goggles.

Ships

Primus

With the loss of the Primus class of battleship the art is essentially abandoned and currently only used in a temporary, [placeholder](#) state until a replacement battleship of some kind is made. The art could find good use in a future primus 2.0

Frigate Sized Ship

A small, Frigate sized craft or patrol craft. It has a pontoon-style body that can be anything from torpedo bays, weapon bays that the front opens up to expose, or even a small hangar for a couple of fighters or bombers for a mini-carrier!

alternative uses could have it as a boarding craft full of Powered Armor and marines, Or a landing craft full of marines and tanks and other vehicles.

Or whatever your imagination can conjure up for it.

It has three turrets. With two single on either side and a single dual turret on the top. A large protruding bridge extends from the back of the ship.

← Rotating gif image. Delete "?200" for it to animate.

Medium to large sized ship

Vague in size and purpose to fit whatever someone wants to make it into.

Stealth Ship

Goes against the usual Nepleslian Thick-Brick aesthetic because it was designed to be a stealth style ship of some kind. somewhere between the [NaX-SC-01a Malchick Stealth Corvette](#) and the [NAM-S1-01a Hray Class Stealth Gunship](#) in size but can be any size or class of ship.

Designed it to use a lot of energy weapons with the bottom being an aether weapon like the [Aether Hellscream](#) so there's not a lot of visible weapon turrets or bays, but you can say it has any kind of weapon it doesn't always have to show on the model to have it!

Doesn't even have to be a stealth vessel either. Can be a science ship, hybrid vessel from unknown or prototype technology, Ship made for spying or whatever you can come up with.

← Rotating gif image. Delete “?200” for it to animate.

Drones

Many of these were made for the [Tech Specialist](#) role in the NSMC and the [Tech-Pack](#) so they are in NSMC colors. Can still be used for non NSMC stuff tho!

Crab-ball drone

Originally made as a personal helper to the tech specialist that can hold the JANE of a tech pack. Little ball looking crab drone with tool like arms and appendages that deploy out of its body. Possibly good for a small repair drone?

← Rotating gif image. Delete “?200” for it to animate.

Saucer Drone

Small gun-drone.

← Rotating gif image. Delete “?200” for it to animate.

Pocket Turret

Small deployable turret.

← Rotating gif image. Delete “?200” for it to animate.

Fire Support Drone

Large drone with a lot of [NAM Extended Rack Missile System](#), a large weapon on a mount that can fire at the ground, and some misc wing weapons. Originally designed to act like a SARP version of a predator drone like what the US airforce uses for counting, spying, firing at the ground, etc.

← Rotating gif image. Delete “?200” for it to animate.

Non-Powered Armor

Armored Vest

← Rotating gif image. Delete “?200” for it to animate.

Weapons

Anti Armor Bomb

A bomb, or perhaps grenade with a powered spike. originally made for an infantry/PA grade explosive that stabs into armor (tanks, PA, buildings, armored doors, ships, stuff you want to not be alive anymore) and explode, sending the spike through the armor with explosive force and through the breach allowing the blast to cause extreme damage a lot like a shaped charge.

OOO Notes

[Charmaylarg](#) created this article on 2020/05/16 05:53.

1)

if I missed any please add them

2)

Whose lore from nep saving some of them in the evacuation of the UOC and giving them a world under their protection was lost
