

Osmiridium

Osmiridium is a material created by the [Scientific Studies Service \(SSS\)](#), it is a composite material made of aluminum combined with [Iridium](#) and latticed with [Inorganic nanotubes](#) of [Osmium](#). Giving Osmiridium its density and tensile strength. Its name comes from these materials *OSM*-ium+*IRI*-dium+dium.

Osmiridium was created by the [SSS](#) during their for several projects on [Daichi](#). These projects required a stronger material than [Durandium Alloy](#), and the [SSS](#) did not want to use restricted military materials for them. The [SSS](#) has given an licenses to [Geshrinari Shipyards](#), other companies to produce Osmiridium. See producers listed below.
