

Sarah Nebula

The Sarah Nebula was a Nebula type destination and is a sub article of [Draco Eridanus System](#).

About The Sarah Nebula

The Sarah Nebula, an expansive anomaly classified as a massive nebula, is positioned 30 light years to the west of the [Sanctum](#). It dominates the skyline of [Station Omacron](#), serving as a captivating celestial feature. In a poignant tribute to [Nyx Pine](#)'s presumed-deceased grandmother, the nebula has been christened the 'Sarah Nebula.'

Comprising a unique blend of gases, the nebula's composition includes 78.09% nitrogen, 20.95% oxygen, 0.93% argon, and 0.04% carbon dioxide, alongside trace amounts of various other gases. Notably, these additional gases contribute to the phenomenon where starship shields undergo a captivating display of colors, making the Sarah Nebula a mesmerizing spectacle in the cosmic expanse.¹⁾
