# **Jhersa**

A fiery, inhospitable world orbiting Paracrux, Jhersa has only been surveyed from afar with no explorers every orbiting or setting foot upon the world due to the intense heat and radiation.

## **Special Features**

#### **Jhersa Ring**

A ring of stellar debris orbiting Jhersa, preliminary surveys indicate high contents of metals available in the Ring. This makes it a more viable target for exploitation when compared to the planet itself. It orbits the planet at an orbital radius of 600,302 kilometers with a period of 768 hours.
