Minato

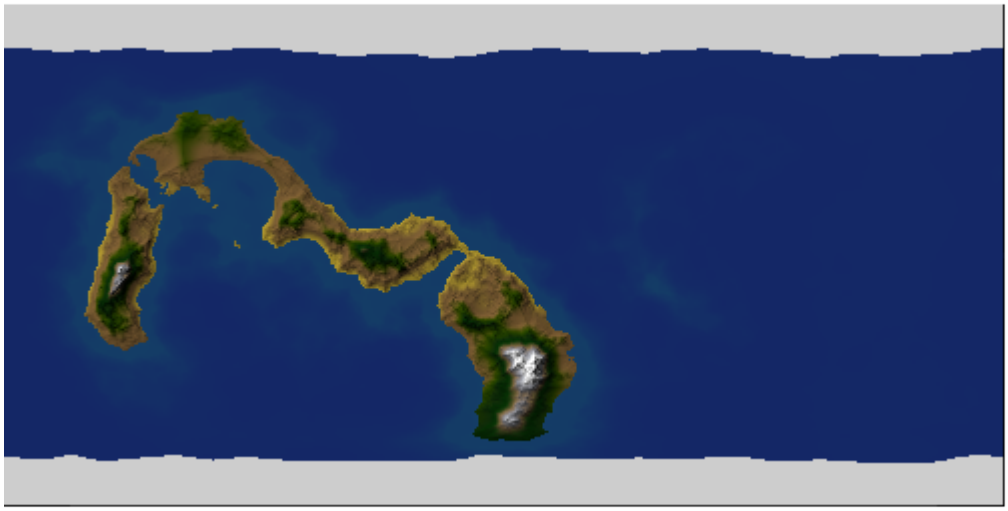

Minato is the third planet in the SX-07.

Minato

The *SSS* surveyed Minato. Colonization was to be handled by the “Department of Colonization”. But in anticipation of receiving UOC survivors, the Second Expeditionary Fleet chose to devote a significant portion of its productivity into the construction of two cities. Construction was originally expected to be completed by end of YE 33, however, the food crisis caused by the destruction of Hoshi no Iori during the Second Mishhuvurthyar War diverted some of the resources, and construction continued into mid YE 34.

Minato has two continents. Oceans cover 86% of its surface.

Heading	Details
Planetary radius:	3161.69 miles
Surface gravity:	1. G
Escape Velocity:	11.00 km/sec
Rotation (day):	22.3 hr
Length of year:	.81 years (295.23 days)
Number of satellites:	2
Population:	75,500
Image:	

Refugee Towns

In YE 33 the Yamatai Star Empire constructed 500 Refugee Towns, capable of supporting 9,200,000 people with additional overflow capability in the form of tent cities if necessary. This was done to ensure the welfare of displaced persons from the former Yamataian colonies in the United Outer Colonies. The Refugee towns serve as a processing area for the new colonists, who go from them to the newly constructed cities. The YSS Sapurai was moved to this planet to help supply the new cities.

Population

- 9 million refugees from Jiyuu III

Cities

- Ichidou
- Masayume
- Agaridan town

Communications Network

In YE 34 a network of EM-O3 "Hirakeru" Communication Satellites were put in place allowing the various settlements to have continuous communications.

Rail System

Rail systems were put in place to connect the two cities with the space port and each other. Tunnels were dug using M.O.L.E.S. - Mineral Ore Location and Extraction System to create the direct route.

Backup facilities

A Community Backup Center is present at the center of the government complex.

Other Facilities

In YE 34 a 2XF Standard "Guriddo" System Deployment came online to protect the planet from space.

There is a Frontier Fort on the planet to defend the surface.

There is a Frontier Starport called Agaridan which handles traffic between the surface and orbit.

Civilian cargo shipping is primarily provided by Trinary Star Shipping, which has storefronts in all of the planet's major cities.
