

Ronica (Planet)

Ronica (*a variant for Veronica*) is the only habitable planet in the [Veronica](#) system, and the new home of [Star Army Training Administration](#).

The surface of Ronica is evenly balanced between water and land masses.

About Ronica

| Heading | Details |
|-------------------|-------------------------|
| Planetary radius: | 7,854 km |
| Surface gravity: | 1. G |
| Escape Velocity: | 11.00 km/sec |
| Rotation (day): | 23 hr |
| Length of year: | .97 years (354.28 days) |

| Heading | Details |
|-----------------------|------------|
| Number of satellites: | 1 |
| Population: | 10,500,000 |

| c | Jótunn ⁸⁾ |
| d | Kengr ⁹⁾ |

Continents

This section provides information on the continents of Ronica.

Naør

Naør or the serpent as it was called is the largest northern continent. Most of Naør is temperate which makes it idea for product of food, animals and other resources.

On eastern point of the point of Naòr is where [Fort Hankou](#), the new headquarters for [Star Army Training Administration](#) was established. A short distance from the Fort is where the colony [Fukuoka](#) was established. [Tenbun Starport](#) is located between the fort and the colony and handles most of the traffic between the surface and orbit.

[Fukuoka](#) was established to support the Fort and also has a strong [Scientific Studies Service \(SSS\)](#) presence. It has a permanent population of 1.3 million residents.

Freki

Freki or the wolf lies in the southern tropics. Freki is predominantly lush rain forests, and mountains. It was considered as the primary site for the new fort, until it was discovered that Freki was tectonically active, and had a large active volcano.

Jótunn

Jótunn or giant is the largest landmass on Ronica, it spans both the northern and southern hemispheres. Because of its sheer size Jótunn has the largest biodiversity on the planet with many variants of a species adapted to different climates.

Refugee Towns

In [YE 33](#) the [Yamatai Star Empire](#) constructed 500 [Refugee Towns](#), capable of supporting 9,200,000 people with additional overflow capability in the form of tent cities if necessary. This was done to ensure the welfare of displaced persons from the former Yamataian colonies in the [United Outer Colonies](#). The 'refugee' colony was established on Jótunn to avoid having all of the population on a single land mass.

Population

- 9.2 million refugees from [Jiyuu III](#)

Kengr

Kengr or arch is the most bleak of continents, it is entirely within the arctic region of Ronica, and forms an arch that runs from Jótunn to Naðr. The majority of Kengr is ice and packed snow, over a rocky, mountainous land mass. Only the southern most edges contain tundra. A small outpost was established on the portion above Naðr. This is used to provide a training ground for soldiers in arctic survival.

The life forms found on Kengr are well adapted to life along its frozen shores.

Oceans

This section provides basic information on the primary seas of Ronica.

Gnótt

Óðr

Logn

Logn or calm is the only ocean on Ronica to be completely land locked. This makes it home to a host of unique aquatic life.

Flójtr

Stórr

Lifeforms

Ronica has an extensive 🌐 [biosphere](#), with thriving creatures in all niches.

- [View details on unique life on Ronica.](#)

Communications Network

In [YE 34](#) a network of [EM-03 "Hirakeru" Communication Satellites](#) were put in place allowing the various settlements to have continuous communications.
