

Siren II

Siren II is the second planet in the [Siren System](#). It is part of the [Yamatai Star Empire](#).

About Siren II

Much like [Jiyuu II](#), Siren II is a 🌍 [Carbon Planet](#) with a metallic core primarily comprised of iron encased by silicon carbide and titanium carbide. Mountains of diamonds and a surface of thick graphite covered with a rich hydrocarbon atmosphere. It was first discovered by the [Fifth Expeditionary Fleet](#) in [YE 30](#). During the time the [Siren System](#) was under [United Outer Colonies](#) control, several small mining colonies were established. After the [Yamatai Star Empire](#) reassumed control in [YE 33](#), more colonies were established. In [YE 42](#), the [Yugumo Corporation](#) began to invest heavily in resource extraction in the system. Improvements were made to existing colonies and more were built. Sixteen active mining colonies, accounting for a population of roughly 6.9 million now dominate the planet.

Places to Explore or Salvage

There are many interesting places on Siren II.

Strange Abomination Habitats

Very strange [Abominations](#) inhabit this world. The [Yugumo Corporation](#) has determined they are a problem to local mining operations and have opened up hunting excursions to eliminate the pests. It is an adventure for the bold, a risky one too as these creatures often are violent and out of control.

Mining Colonies

The Sixteen active mining colonies all belong to the [Yugumo Corporation](#) and [Ketsurui Zaibatsu](#), each colony has its own local culture and places to explore. They are not designed to be tourist destinations but they make good outposts to stop for supplies or base operations for claim pioneering.

Orbital Assets

The [Star Army of Yamatai](#) established a "[Guriddo](#)" [Defense System](#) as part of the Siren System Defense Plan laid out by [Ketsurui-Motoyoshi Katsuko](#) in [YE 42](#). The system includes:

- 20 [Ke-H5-W3200 "Kyouheki" Defense Platforms](#) each typically controls two [Ke-H5-M3200 "Nesuto" Docking Platforms](#), but can handle more.
 - 10 [Ke-H5-M3200 "Nesuto" Docking Platforms](#) each with 18 [Ke-H5-W3201 "Suzumebachi" Attack Drones](#)
 - 180 [Ke-H5-W3201 "Suzumebachi" Attack Drones](#)

The [Yamatai Star Empire](#) placed global communications networks of [Emrys Satellites](#) into orbit of all of the system's terrestrial worlds in [YE 36](#).
