Starship Wreckage

One large crater is detectable from near orbit, containing bits of wreckage from several crashed [Star Army of Yamatai](#) and [Sfrarabla Mishhuvurthyar Xhrafuklurp \(SMX\)](#) vessels. The only known survivors were two Neko sprites and one [Crab-Type Mishhuvurthyar](#). From approximately [YE 30](#) to [YE 37](#) the Neko were stranded here, attempting to hold the Crab-Type at bay and counter its attempts to assimilate the local wildlife. The creature was destroyed with the assistance of the [YSS Heartbreaker](#), which removed the two Neko from the planet, leaving behind a fortified temporary base within some of the planets ruins containing salvaged Star Army and SMX technology.
