

# Yamatai (Planet)

Yamatai is the homeworld of the [Yamatai Star Empire](#) and is inhabited by over 20 billion people. It is located in the [Yamatai Star System](#). It was formerly called Geshrintall.

## Background and History

Yamatai, known then as Geshrintall, was first settled over 1,000 years ago by ancient interstellar humanoids traveling on starships that came from [Planet Nepleslia](#). As civilization developed on the planet, the computers from their starships became increasingly potent and sentient, eventually laying claim to the southern islands and creating [AvaNet](#), a society of artificial beings who became to be revered as gods.

Eventually, as different factions struggled for control of the planet, total war broke out, resulting in a horrible plague that wiped out most of the animal life on the planet. The Geshrin are recovering, but the majority of Yamatai's population is now made up of [Nekovalkyrja](#).

After [AvaNet](#) left the Planet in [YE 21](#), Empress [Ketsurui Yui](#) renamed the planet from Geshrintall to Yamatai.
