

# Species

This list is meant to be a comprehensive list of all species in the [SARPiverse](#) and is intended for reference purposes. It is sorted into playable species, non-playable species, and it also has a list of all pages in the species namespace (some species might not be tagged as playable or non-playable yet).

## Playable Species

Here's a list of species that staff have marked as being playable. Playable means you can make player characters of these species types. Feel free to ask [Wes](#) if you have any questions.

## Non-Playable Species

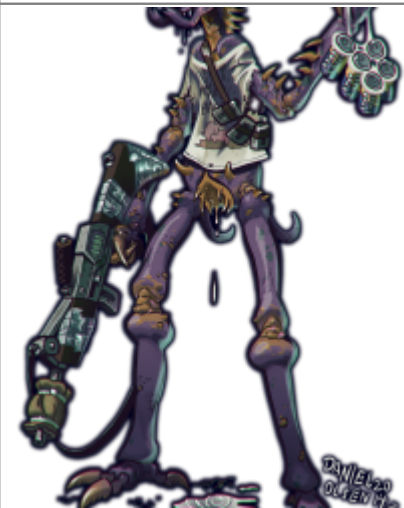

These species are not really well-suited to being playable for various reasons. Mainly that the site revolves around the Star Army and its allies and the species below are often intended as enemies for the player characters. Alternatively, there might not be enough detail to support being playable.
