

Tula

The Tula are a species of the [Poku Saeruo Degonjo](#). They are evolutionary cousins to the [Qaktoro](#), and they developed concurrently with them on the same [Otâgolisoy \(Birth world\)](#). During the [Norka \(The Exodus\)](#), the Tula traveled with the Qaktoro to eventually settle the [Degonjo Saeruo \(Hidden Sun System\)](#) alongside them. All Tula are considered part of the [Poku Vit \(Plant Clan\)](#), the only surviving sub-clan of the homeworld's original clan system. Some members of the Tula actually go through the [Qaktoro](#) version of the [Baqnor \(move from youth\)](#) and become full clan members.

Their name, *Tula*, is used both as a singular and plural word, and is pronounced tū-lă. Many of the Tula are employed as [Obekâ'ai \(Retainers\)](#) in the [Punlai \(Families\)](#) and [Ruokai \(Houses\)](#) of the Clan. The [Otâmovi Wiy Jael \(Silver Moon Sect\)](#) also employs many Tula.

The Tula are notable for the ability of many of their number to use [Vit'taka \(Plant Speech\)](#).
