

Ke-P5-10 - POM Communications Center

The POM Communications Center is a component of the [Type 33 Prefab Outpost Modules](#). It became available in [YE 33](#).

About the Communications Center

The Ke-P5-10 serves as the primary communications hub for the Outpost. It is a compact domed structure with an antenna tower. It provides planetary and interstellar communications.

The communications center has the following systems:

- Radio - Full spectrum, Dual-Modulation, capable of video, voice, and data transmission.
- Laser - For close-range transmissions, it is more difficult for the enemy to intercept, because they have to be in the area of the beam.
- Subspace - faster-than-light communications, transmission is limited to 5 light years.
